EDITOR'S LETTER

Eyes on 2025

IF YOU'RE ANYTHING LIKE ME, the start of a new year always brings a mix of hope, a few ambitious goals, and let's be real—a decent amount of squinting at your budget wondering how to turn big plans into reality.

But there's something about the start of the year that feels exciting, especially for property investors. It's a clean slate, a fresh chance to spot the next hotspot or lock in that long-awaited deal. And what better way to kick off than with our 2025 Annual Suburbs Guide? We've sifted through the data to bring you the top 100 high-growth suburbs worth keeping an eye on this year. If you're looking for your next move, consider this your starting block.

Also on the agenda: interest rates. After a brutal couple of years, whispers of lower rates in 2025 might have you wondering what's next for your portfolio. Could this be the year we finally get a bit of relief?

On the flip side, not everyone is as bullish on Aussie property. International investors, particularly from China, are starting to pack up shop, citing sky-high costs and dwindling returns. It's a trend that could shake up the market - and perhaps create opportunities for local buyers.

Property investing isn't always straightforward, and we're exploring two key areas that can throw investors off track. Buying a tenanted property might seem like an immediate cash cow, but it comes with risks you need to understand. And as the debate over negative gearing rages on, we've broken down what the hypothetical removal of this tax perk would mean for investors in the years ahead.

As we step into 2025, *Your Investment Property Magazine* is here to help you stay ahead of the trends and make savvy property moves. Whether you're eyeing a new purchase, fine-tuning your portfolio, or simply tracking the market, we've got all the insights you need.

And on a quick personal note - I'm moving to London, so this will be my last edition as Editor of *Your Investment Property Magazine*. It's been an honour to lead this magazine over the past three and a half years, and while it's bittersweet to say goodbye, I'm excited for what's ahead.

Big thanks to our readers and contributors for making YIP what it is today.

Home prices end the year down

THE LATEST CORELOGIC DATA SHOWS AUSTRALIA'S RESIDENTIAL PROPERTY VALUES PEAKED IN OCTOBER, remained steady in November, and slipped in December.

The monthly decline in the Home Value Index was also enough to drag the quarterly change into negative territory, also down -0.1%.

It ends a period of growth between February 2023 and October 2024 when home values continued to rise despite high interest rates, cost-of-living pressures, and reduced borrowing capacity.

CoreLogic research director Tim Lawless said the December decline is no surprise.

“This result represents the housing market catching up with the reality of market dynamics,” he said.

“Growth in housing values has been consistently weaking through the second half of the year, as affordability constraints weighed on buyer demand and advertised supply levels trended higher.”

Shortage of investors worsens rental crisis

NEW RESEARCH FROM the Property Investment Professionals of Australia (PIPA) and the Property Investors Council of Australia (PICA) highlights a significant shortfall of property investors, exacerbating Australia’s rental crisis.

The study found that while Australia’s population grew by 1.8 million between March 2019 and March 2024, the rental market needed an additional 145,000 investors to supply 212,000 new rental properties. However, Australian Taxation Office (ATO) data shows only 110,000 investors entered the market during this time, leaving a gap of 35,000.

PIPA Chair Nicola McDougall said investor numbers had grown steadily until 2018 but have since been stifled by policy changes.

“Restrictive lending, tax hikes, and increased regulations have deterred investors, and we’re seeing the consequences now,” she said.

PICA Chair Ben Kingsley noted the impact on rental supply, citing a drop in the national vacancy rate from 3% in 2017 to 1.2% in 2024.

“This shortage of investors has directly led to fewer properties available for rent, worsening conditions for tenants,” he said.

Industry experts are calling for policy reforms to attract more investors and ease rental pressures.

Darwin and Melbourne named as 2025 hotspots

HOTSPOTTING'S TOP 10 NATIONAL BEST BUYS REPORT has named Australia’s property investment hotspots for 2025, with Darwin and Melbourne making surprising entries.

The list includes locations across Victoria, New South Wales, Queensland, the Northern Territory, and Tasmania, featuring areas with strong potential for long-term growth.

Hotspotting Director Terry Ryder said the report focuses on opportunities rather than areas already experiencing rapid price increases.

“We’ve avoided locations that are currently hot, like Perth and many Queensland regional markets, instead selecting places that present good buying opportunities for the future,” he said.

Darwin and Melbourne earned spots for their affordability and rebound potential.

“Melbourne struggled in recent years but is set for a come-back thanks to its relative affordability compared to Sydney and ongoing population growth,” Mr Ryder said.

“Meanwhile, Darwin offers high rental yields and signs of price growth, making it increasingly appealing to investors.”

The report evaluates regions based on factors like infrastructure, employment, and lifestyle, aiming to identify markets with strong prospects for capital growth.

Apartments surge in popularity amid growing price gap

NEW RESEARCH FROM NUESTAR AND HOTSPOTTING SHOWS a widening price gap between apartments and houses, with apartments selling for up to half the price of houses in some areas.

Michael Wilkins, Founder & Director of Property at Nuestar, said apartments’ affordability is driving demand from both homebuyers and investors heading into 2025.

“Owner-occupiers and downsizers with significant equity in their homes are leading this shift, as they’re less impacted by higher interest rates,” Mr Wilkins said.

“At the same time, higher gross yields on apartments are attracting investors back to the market.”

Nationally, the median house price is \$869,000, compared to \$661,000 for apartments – a 27% difference. In Sydney, the gap is even more striking, with houses costing \$632,000 more than apartments on average.

Hotspotting Director Terry Ryder said buyers are resetting their expectations and turning to apartments, particularly in inner-city and lifestyle markets.

“The affordability factor is undeniable, but we’re also seeing many apartment markets outperform houses in terms of price growth and rental yields,” Mr. Ryder said.

The trend is expected to continue into 2025, with apartments offering a more accessible entry point for buyers and strong growth potential for investors.

SPECIAL REPORT

100

HIGH GROWTH
SUBURBS THAT
WON'T BREAK
THE BANK

Looking for affordable investment hotspots in 2025 with high growth potential and a lower entry price? We've crunched the data to uncover 100 budget-friendly suburbs across Australia where strong capital growth and rental returns could power up your property portfolio.

PROPERTY INVESTING ISN'T JUST ABOUT SNAPPING UP ANY HOME WITH A 'FOR SALE'

SIGN — it's about finding areas that fit your goals and budget. But when median prices in some parts of Australia are inching toward seven figures, where do you even begin? We crunched the numbers to uncover suburbs where real estate is still within reach while offering solid growth potential.

We set the bar high with strict investment criteria focused on long-term value. To make the cut, suburbs needed affordable median prices under \$600,000, with many in the \$350,000–\$500,000 range.

We also looked for steady price growth of at least 5% annually, properties selling within 60 days, and at least 30 sales per year to ensure active market demand. Strong rental yields of 5% or more, low vacancy rates, and proximity to major infrastructure sealed the deal, pointing to both solid returns and future growth potential.

Despite casting a wide net, states like NSW, ACT, NT, and TAS didn't make the final list. While they have promising pockets, their suburbs often fell short on key metrics like rental yields, price growth, or buyer demand compared to standout areas in QLD, WA, and SA.

At the end of the day, there's no magic formula for property investing—it all comes down to syncing up your budget, comfort level, and long-term goals. Think of this list as your starting block, not the finish line. Use it to guide your research, scope out suburb profiles, strike up conversations with locals, and pick the brains of a few agents. The more you explore and the more data you unpack, the more confident you'll feel about nabbing that next standout property.

WHAT'S THE CRITERIA?

- **Maximum median value** of \$600,000 or less. There are many homes on this list priced between \$350,000 and \$500,000.
- **Average annual growth** of at least 5%; this may not have been linear growth, but over the last 10+ years, these suburbs have increased in value by an average of at least 5% per year.
- **Time on market** of no more than 60 days. When it takes longer than two months on average for properties to sell in a particular market, that can indicate slow demand, which can dampen property price growth. Additional weight was given to suburbs with time on market under 30 days, indicating exceptional market activity.
- **Number of properties sold** - at least 30 per year. A low number of transactions per year indicates a slow-moving market, so we looked for areas with a higher turnover.
- **Rental yield of at least 5%** - suburbs with higher yields offer stronger cash flow potential, with those exceeding 6% scoring the highest.
- **Low vacancy rates inferred from shorter time on market** - suburbs where properties sell quickly are likely to have stronger rental and buyer demand, boosting long-term investment appeal.
- **Proximity to major infrastructure and city centres** - suburbs within 50 km of a major city centre (measured by GPO distance) scored the highest due to better access to amenities and future growth potential.

ARMADALE IS A SUBURB THAT BLENDS AFFORDABILITY WITH SERIOUS INVESTMENT POTENTIAL. With median property prices sitting at \$501,000 for houses, it’s a smart option for budget-conscious buyers and savvy investors. What really stands out is the impressive growth—house prices have jumped 43% over the past year and 130% over five years, making it a strong contender for long-term gains. On the rental side, the numbers are just as compelling, with median rents at \$550 per week for houses, delivering gross rental yields of 6%. Properties in Armadale are also moving fast, with an average of 17 days on market. Combine all this with its family-friendly vibe, proximity to shops, schools, and public transport, and Armadale shapes up as a location with both lifestyle appeal and solid returns.

Image source: realestate.com.au

BEENLEIGH, NESTLED IN QUEENSLAND’S LOGAN REGION, hits the sweet spot of affordability, convenience, and investment potential. Positioned at the crossroads of the Pacific and Logan Motorways, and serviced by Beenleigh Train Station, it offers seamless connectivity to both Brisbane and the Gold Coast. For property investors, Beenleigh is making waves with promising growth and rental returns. The median unit price is \$385,000, having surged 29% in the past year and an impressive 96% over five years. Rental demand remains strong, with median weekly rents at \$410, delivering a solid 6% rental yield. Properties here spend just over 24 days on the market on average, showing steady buyer interest.

Image source: realestate.com.au

CAPALABA, LOCATED IN BRISBANE’S REDLAND CITY AREA, offers a combination of suburban convenience and strong investment potential. Locals appreciate its convenience, with everything from major shopping hubs like Capalaba Park and Capalaba Central to family-friendly parks and schools all within easy reach. Public transport connections and major roads make it an ideal spot for those who commute to Brisbane or nearby areas.

On the property front, Capalaba has been quietly gaining traction. The median unit price of \$570,000 reflects a solid 20% growth over the past year and nearly 81% over five years. The rental market is equally strong, with weekly rents averaging \$560 and a gross rental yield of 5%. Properties here don’t linger long, spending just 24 days on the market on average.

Yuan in, Yuan out

Foreign buyers snapped up 15% fewer Aussie homes in the last financial year. So what’s behind the drop—and is it a win or a loss for investors? **Harry O’Sullivan** finds out.

RANTS ABOUT THE AMOUNT OF PROPERTY OWNED BY FOREIGNERS ARE PRETTY ENTRENCHED IN AUSTRALIA THESE DAYS. We’ve all got an acquaintance or two who you can rile up just by saying the words ‘Chinese investors’. It’s a hot button issue

politically too. Pauline Hanson addressed parliament earlier in the year demanding a complete ban on overseas investors, while Peter Dutton said the Coalition intends to implement a two-year ban on foreigners buying established dwellings. With seemingly relentless property

price increases throughout much of the country, it’s easy to understand why this might be a popular idea. However, the official numbers from the Foreign Investment Review Board (FIRB) suggest foreigners are already less inclined to invest in Australian property. In FY24, ➤

➤ there were 5,581 total approvals for foreign investors buying residential real estate, down from 6,576 in the previous year. The total value of these transactions fell from \$7.9 billion to \$6.6 billion despite prices rising significantly since. Investment proposals from Chinese investors, by far the biggest proportion of overseas buyers, declined more than 23% from FY23. If that ban on foreign investment becomes an election issue, we might start to hear a lot more about this drop in the coming months. So what’s happened? Is this a blip or a turning point? And what does it mean for Australian investors?.

Escalating costs

Dr Nicola Powell, Chief of Research and Economics at Domain, believes overseas buyers are increasingly put off by the cost of buying Australian property. “We have to remember that foreign buyers do have higher applications costs....fees, [FIRB] approval, extra taxes and duties they have to pay,” she told *Your Investment Property Magazine*. “The higher overall cost relative to what a local buyer would be paying is a disincentive.”

Policy changes have contributed to this. The Government changed the foreign investment framework at the end of last year to “provide more homes for Australians”. Since 9 April, the fees foreign investors have to pay when buying established properties tripled. A foreign investor buying a property valued between \$75,000 and \$1 million now has to pay a fee of \$44,100 - prior to this change, that fee was \$14,100. That’s on top of the surcharges levied by state governments. In NSW for example,

foreign property investors have to pay surcharge purchase duty and land tax. The vacancy fee, charged when the property is vacant or not ‘genuinely available for rent’, was also doubled. There’s also the foreign resident capital gains withholding rate, which will be increased from 12.5% to 15% from January 1. When a foreign investor sells an Australian property, 15% of the sale price will go to the ATO. Ms Powell also pointed out the decline in FY24 followed very strong numbers from the previous year.

“We’re comparing it to an extreme period...we know that we saw that rebound [in investing] once the borders reopened,” she explained. Nevertheless, those cost barriers aren’t going anywhere, and Ms Powell said she wouldn’t be surprised to see the rules for foreign investors becoming even stricter in 2025. “I think what governments are trying to do is disincentivise foreign investment,” she said.

What does it mean for investors?

Instinctively this probably sounds good for buyers, but bad for sellers. Less interest from foreign investors equals less demand and therefore less competition. Mr Dutton made it clear this is the rationale behind the proposal from the opposition for a temporary hiatus on overseas buyers. “Imagine...you finally have enough to buy your first home so you put in a good offer only to be outbid by someone who doesn’t live in this country,” he tweeted in October. “[The temporary ban] will give young people a fair shot at owning their own home.”

We won’t know exactly how policy will change until after the federal election, set for around May next year, but the fees and tax rules are extremely unlikely to go anywhere. Foreign investment declining further in FY25 could be probable at this stage, but for budding investors getting their hopes up about a major drop in prices, it’s worth glancing at the numbers first.

What does 2025 have in store?

So if you’re happy with your current property portfolio, this all might sound like good news, at least as far as your investment is concerned. Less new dwellings being built to compete for the attention of buyers with Australia’s existing dwellings might sound like a recipe for price increases. If the Coalition is successful in May’s election and implements the temporary ban, this might sound even better. On the other hand, for those still on the hunt to buy their first investment property, declining international investors might be alarming. Before you draw too many conclusions either way though, there’s a case study to look at. At the beginning of 2023, the Canadian Government announced a ban on foreign home buyers that has recently been extended. The goal was to make homes more affordable, but as of the end of 2024, the general consensus suggests the ban has had little impact on property prices. [YIP](#)

GENERAL FIRB GUIDELINES

- **New dwellings:** Usually approved with minimal conditions.
- **Vacant land:** Typically approved as long as construction of a new dwelling is planned to be completed within four years.
- **Established dwellings:** Foreign investors can apply to buy an existing property for redevelopment as long as it genuinely increases Australia’s housing stock - knocking down a standalone house and replacing it with an apartment block, for example.
- **Buying a home to live:** Temporary residents can apply to buy one property to live in while in Australia but it must be sold once they leave unless they become a citizen.

Cut to *the chase*

Christmas arrived before a cut to the cash rate in 2024, so with pundits now expecting interest rates to fall sometime in 2025, what will it mean for property investors? **Denise Raward** reports.

ONCE AGAIN, WE'VE BEEN REMINDED THAT PREDICTING INTEREST RATE MOVEMENTS IS JUST AS SLIPPERY FOR ECONOMISTS AS IT IS FOR THE REST OF US.

The much-anticipated cut to the cash rate didn't materialise in 2024, but it didn't stop investors storming into the residential property market.

At one point last year, investors accounted for 38.3% of all new home loans being financed in Australia, the highest level since 2017.

The latest September lending data from the Australian Bureau of Statistics (released in November) showed the number of new investor loans was up 18.8% from the previous year, suggesting

investors weren't exactly waiting around for interest rates to drop.

The total value of those loans was up a considerable 29.5% on the previous 12 months, suggesting they weren't waiting for home values to plummet either.

As you might expect, growth in the number of investor loans was strongest in the gangbuster price growth states of

Western Australia and Queensland, with perennial New South Wales also holding its own.

At the same time, investor lending was more subdued in the floundering markets of Victoria and Tasmania, growing just 5.1%. Both Victorian and Tasmania also recorded higher numbers of previous investor listings being offered for sale,

according to CoreLogic.

It indicates what we all probably know: property investors love a bit of capital growth – regardless of what interest rates are doing it seems – but where values are sluggish, some will choose to sell.

Property analysts widely tip the Perth, Adelaide, and Brisbane markets to continue on their upward trajectories in

2025, albeit at a slower pace, while the rest of Australia's capital city markets are expected to languish or go backwards. It seems Darwin is the dark horse that could go either way.

The expert forecasts are almost universally based on the Reserve Bank making a cut, or cuts, to the cash rate in 2025 which is expected to put a floor ➤

► under price drops in the falling markets and spur the rising markets even higher. Property marketplace Domain’s chief of research and economics Nicola Powell said the flurry of investor activity in the past year suggests astute investors have taken advantage of the overall slowdown in market dynamics.

Pictured: Dr Nicola Powell, Domain Chief of Research and Economics

“I think what we’ve probably got are some investors making their move before the cash rate is reduced, because what’s likely to happen is once that cash rate is reduced, and particularly once we see a few rate cuts coming through, we start to see Australia’s overall sentiment rise,” Dr Powell told *Your Investment Property Magazine*. “We know that investors are sparked more so by capital growth - and the prospects of capital growth - and you can

see the locations where they’re going. “We also know that when the cash rate is reduced, that’s going to improve sentiment for all Australians and that means higher rates of turnover and more competition, so those astute investors have been making the moves when buying conditions are better.” Dr Powell is among many property market analysts predicting that the first cash rate cut of 2025 - whenever that may be - will mark a change of gear in the housing market. “I think rate cuts will shape 2025, [in terms of] borrowing capacities and the actual confirmation that finally inflation is under control. That’s going to provide clarity for many,” she said. “I think there will be a sigh of relief across Australia when we see that rate reduction actually come through and delivered, and I think it will influence people’s decisions. I think some people [have been] holding off their decisions to buy and sell, and that impacts investor decisions also.” But with interest rates grabbing centre stage, Dr Powell nominated another variable that could well shift the housing market into another gear mid-year and that is the 2025 federal election. “Housing will be a key battleground for the election and so I think there are things to watch,” she said. For investors, she noted negative gearing and capital gains tax had already reared their heads in political discussion in 2024 and may well be back on some parties’ agendas. She also suggested the housing market could be affected by election-driven policies aiming to bring first-time or low-income buyers into the market and that may influence entry-level home prices

particularly. “I think with the different policies, that’s going to impact and influence different buyer demands and segments and therefore, price points,” she said. It is the more affordable end of the market that has already seen the most growth in 2024. On a national basis, the bottom quartile of market values rose 10.3%, far outperforming the middle and upper quartiles across Australia, according to CoreLogic data. The top 10 growth suburbs in Australia in terms of capital city house values were all located in Perth with all delivering value increases of more than 30% over the year. Unit value price growth was shared across Brisbane, Perth, and Adelaide. As well as owner-occupiers seeking affordability, investors eyeing growth will continue to be active in that segment of the market, property analysts agree. **Refinancing wars reignited** Meanwhile, some financial market analysts are also tipping that a cut to the cash rate may well spark another round of intense competition in the home lending market. The so-called “mortgage wars” were triggered in mid-2023 when banks and non-bank lenders competed for market share as many Australians rolled off low fixed rates that were available during the pandemic era. It saw lenders compete to undercut each other’s interest rates and offer cashbacks and other promotional deals to entice refinancing homeowners and investors. Even before a cash rate cut, many lenders began lowering their home loan

interest rates in the second half of 2024 as rates started to fall on global money markets where many source some of their finance. First, it was fixed rates that began to drop with some lenders then lowering variable rates - a move some analysts believe is to position themselves for another possible round of renewed competition in the mortgage market. Director of structured finance at international credit ratings agency S&P Global Erin Kitson said refinancing may be “reenergised” when rate cuts finally take effect. “The prospect of lower rates is likely to boost consumer sentiment and spending decisions,” she told *Your Investment Property Magazine*.  Pictured: Erin Kitson, Director - Structured Finance, S&P Global “Lenders may seek to capitalise on improving consumer sentiment by offering competitive mortgage rates,

stimulating refinancing, particularly for borrowers who’ve built up equity in their mortgages.” She said cash rate cuts will help ease debt burdens across the board, given Australians’ high exposure to variable rates. (In 2024, 98% of all new home loans were at variable rates.) Interest rate cuts will also effectively increase the amount people can borrow which, in turn, can drive property prices higher. Ms Kitson said while rising property prices increase the amount of debt people need to take on to get into the property market, they also increase borrower equity for those already there. “Unlocking built-up equity through refinancing may be a strategy deployed by some households to purchase another property,” Ms Kitson said. “This strategy may gain more momentum when rate cuts take effect, and this can further increase demand for property.” So, for investors, 2025 may bring a mixed bag. The long-anticipated cut - or cuts - to the cash rate is likely to bring more buyer competition from owner occupiers who may have been holding off for interest rates to fall. Any rise in owner occupier and first homeowner activity could also mean a drop in rental demand as new purchasers move into their own homes. While rental values across Australia remained high in 2024, growth rates were softer as net overseas migration rates slowed. For those looking to expand their property portfolios, it may pay to keep

an eye on the home lending market for rate-cut refinancing offers that could allow access to built-up equity after an extended period of home price growth (in some markets more than others). The final variable for 2025 is the federal election, due by 17 May, where housing is expected to be a hot ticket issue. Although Federal Treasurer Jim Chalmers effectively ruled out any changes to negative gearing and capital gains tax in October, there is no telling what could be on the table if there were to be a minority government seeking to win the favour of minor parties and independents. As ever, it is interesting times. As well as interest rates, property analytics company SQM Research has thrown population growth, inflation, and broader economic factors into its property value forecasts for 2025. Below, SQM Research boss Louis Christopher outlines his alternative scenarios: **Property Value Forecasts We need to talk about Victoria** Victoria has been something of an outlier in national housing data for some time. Many analysts are predicting a cash rate cut won’t necessarily spark a turnaround in its falling market but may put the brakes on it slipping further. The state’s home values began slowing compared to other states during the pandemic and have been falling since 2023. During 2024, Melbourne trailed all the Australia capital cities to record a 2.3% fall in its home values over the calendar year. It’s been an even tougher ride for ►

► investors with the Victorian government lowering land tax-free thresholds for investment properties from 1 January 2024.

Although it's never been revealed how many extra investors were affected by the changes, it's estimated around half a million investors will pay \$4.74 billion over the next four years.

It's reasonable to suggest it's one of the reasons more former investment properties found their way onto the Victorian market over the past 12 months.

CoreLogic data found listings of previous investment properties in Victoria in October accounted for 29%

of the national figure - up 10.6% on the state's previous five-year average.

PropTrack also ran the data and surmised almost 5,000 more Victorian investors sold up compared to other states since in the nine months since the land tax changes took effect.

The sale of former investment properties may also be due to a combination of sustained higher interest rates, falling property prices, cooling demand in the rental market, and state tenancy regulations.

At the same time, new investor loans are also relatively subdued in Victoria compared to previous years and the significant national jump in investor

lending.

PropTrack senior economist Paul Ryan believes this will have an impact on long-term housing construction in the state over the coming years as investors are key for the viability of many high-density projects that require pre-sales many years before they're completed.

Analysts widely agree things are not looking promising for the Victorian market even with an anticipated interest rate cut, but Domain chief of research and economics Nicola Powell said there may be a silver lining ahead.

"I do think you'll have a slice of investors that will be looking at Melbourne as a market of opportunity," Dr Powell said.

"What we've had in Melbourne is a market that has underperformed for the last two years, pretty much since around mid-2022, it's underperformed relative to all other capital cities."

She said with an increase in Melbourne house prices since March 2020 of just 12.5%, the lowest of any capital city, it means value is building.

"There is going to be a point in time where buyers see Melbourne as undervalued, and investors will be watching that," Dr Powell said.

"So, I think for those investors looking for the long-term hold, they'll be looking at Melbourne for that opportunity of purchasing a house on the largest block they can afford in a good, family-orientated location where they're going to see the prospects of capital growth in the years to come.

"It's likely not going to be in 2025, but they will be looking to hold because I'm personally convinced that when we get to another proper price cycle, Melbourne has had such a period of underperformance that it is likely to overperform in the next price cycle." [YIP](#)

	Scenario 1	Scenario 2	Scenario 3	Scenario 4
City	• 25-50 basis point rate cut in mid-2025 • Population growth continues at 500,000+ • No new inflationary outbreak	• No rate cut in 2025 • Population growth continues at 500,000+ • No new inflationary outbreak	• Rate cut March quarter • Population growth continues at 500,000+	• Population growth falls to less than 400,000 • No rate cut • Commodity prices remain stable
Perth	+14% to +19%	+7% to +11%	+15% to +20%	+7% to +11%
Brisbane	+9% to +14%	+5% to +9%	+11% to +16%	+4% to +8%

For sale, *with strings attached*

SELLING A RENTAL PROPERTY WHILE TENANTS HOLD A LEASE CAN BE TRICKY. Open inspections, potential buyers driving by, and regular contact from the selling agent to arrange inspections can all significantly disrupt tenants' daily routines.

The rules surrounding the selling of tenanted properties differ slightly between states and territories but suffice to say, a smooth sale process will rely on good communication and respect.

Here are some points to consider.

Notify your tenants

Before you begin the selling process, it's imperative you notify your tenants that you're planning to sell the property. It's good practice to provide as much notice as possible. Some state regulations stipulate tenants should receive two weeks' written notice before the property is placed on the market.

There are also rules dictating how

much notice tenants are required to have before prospective buyers can inspect the property. It can be up to two weeks' notice before the first inspection while, some states stipulate at least 24- or 48-hours' notice before each inspection. (See more details on individual state and territory requirements below.)

The key here is to communicate with your tenants as early as possible and be open to discussing any of their concerns.

Schedule or move forward routine inspections if possible

Each state and territory has its own regulations surrounding routine inspections, which can generally be conducted once every three or six months, usually with a minimum written notice period of seven days.

It can pay to seek permission to push this forward to allow you to see if there's any maintenance or cosmetic work that may need to be carried out before the

property goes on the market.

It's worth noting in some states, tenants have the right to refuse to bring inspections forward. In others, inspections can be carried out as long as tenants have been given the required notice period.

Your tenants' lease remains in place

The lease in place for your rental property remains valid even if you choose to put the property on the market. It also remains valid after the sale and the new owner will be required to honour it.

Owners generally can't terminate a tenancy agreement to facilitate the sale of the property. However, in some cases, the lease can be terminated through mutual agreement.

If the tenant is on a periodic lease, you're entitled to end the lease agreement, but you must provide the legal notice period required in your state or

territory, which could be anywhere from 30 to 120 days.

Be respectful of your tenants

Remember your property is your tenants' home. By placing it on the market, it can place their future housing arrangements in jeopardy should it be purchased by an owner occupier.

By understanding and respecting their position, you can contribute to a smooth sale process. Be sure to address any concerns they express and be prepared to compromise if sale arrangements pose reasonable difficulty or inconvenience for them.

The better the relationship between owner and occupant, the more likely tenants will likely be to ensure the property is well looked after and presentable for inspections. Be aware too that a property that already comes with good tenants can be an attractive proposition for potential investors. ➤

► Tenants must consent to signage and photography

As a landlord, you can photograph the outside of your investment property without permission, but you’ll need your tenants’ consent if you wish to get internal pictures. The selling agent will also need to obtain permission from them before publishing images featuring their possessions and chattels in any marketing material. (This can be legally refused by some tenants fleeing domestic violence situations.)

You’ll also need to get the go-ahead from your tenants before any signage is placed out front of the property. If they don’t want any, they can’t be placed there. They can also refuse for on-site auctions to be conducted on the property.

This is not the case for strata scheme properties, where signage and on-site auctions are permitted without individual tenants’ consent.

Tenants can be present during inspections

Tenants have the right to be there during property inspections and, in some jurisdictions, can refuse an open home request under certain circumstances. In many states, the number of inspections may be limited to two a week unless the tenant agrees to more.

Victoria’s tenancy laws also stipulate tenants receive monetary compensation for every sales inspection that takes place, equal to half a day’s rent or \$30, whichever is greater.

Again, communication is key. Speak to the selling agent about limiting the number of inspections or scheduling them at convenient times for the tenants. Even though there are rules surrounding home inspections, courtesy also goes a long way.

Consider compensating your tenants for any inconvenience

Although some states will lay down legal compensation requirements, as a landlord, you can choose to go over and above to keep your tenants happy. How you do this is entirely up to you. If you own multiple investment properties, you may offer to rehome your tenants in another of your properties if that’s convenient for them.

You could choose to shout them a weekend away while open houses are conducted or reduce their rent. You may waive notice periods if they decide to terminate the lease because they don’t want the disruption that comes with the sale of the property. You might even offer to contribute to their costs associated with moving.

‘Doing the right thing’ may not be what the legal requirements state but it can create a ‘win, win’ vibe for all parties and negate any ill-feeling.

Keep the tenant in the loop

Be sure you keep abreast of whether your tenants are happy with communications with your selling agent. If you manage the investment property yourself, keep them informed of what’s happening with the sales process and check in regularly to see how they’re being impacted.

If the property is managed through a property manager, get them to inquire on your behalf so that you can address any concerns and ensure your tenants feel they’re not being neglected during the sales process.

After the sale

Letting a tenant know you appreciate their understanding and cooperation during the sales process is a nice gesture. You might choose to give them a gift or at least provide them with an excellent reference that they may be able to use when they apply for their next rental property.

Keep the tenant in the loop

New South Wales

- **Written notice**

You must provide at least 30 days’ written notice if you wish to terminate the lease at the end of the agreement period, or 14 days’ notice before the property is first made available for showing.

- **Eviction**

No eviction can occur for a fixed lease unless the lease is violated or both parties reach a mutual agreement to terminate the tenancy agreement.

- **Notice required for inspections**

At least two weeks’ written notice before the first inspection, 48 hours for subsequent inspections (no more than two per week).

- **Time restrictions on access**

Inspections should not occur before 8am or after 8pm, on Sundays or public holidays, or be for longer periods than necessary unless tenants consent.

Victoria

- **Written notice**

You must provide 60 days’ written notice if you don’t wish to renew the tenants’ fixed lease at the end of the agreement period, or 14 days’ notice before the property is first made available for showing.

- **Eviction**

No eviction can occur for a fixed lease unless the lease is violated or both parties reach a mutual agreement.

- **Notice required for inspections**

48 hours of notice is required for inspections, with no more than two showings a week.

- **Time restrictions on access**

Inspections should not occur before 8am or after 6pm, on Sundays and public holidays, and cannot last more than one hour. Compensation equal to half a day’s rent or \$30, whichever is greater, must be paid to the tenant for every showing.

Queensland

- **Written notice**

You must provide written notice to tenants of intention to sell as well as four weeks’ notice if termination of the lease is mutual. The property manager/owner must provide the tenant with an official form notifying them of the intention to sell and supply plans of how the property will be marketed.

- **Eviction**

No eviction can occur for a fixed lease unless the lease is violated or both parties reach a mutual agreement.

- **Notice required for inspections**

Landlords must provide at least 24 hours’ notice for both the first and subsequent inspections. An open house or on-site auction can only be held with the written permission of the tenant.

- **Time restrictions on access**

Inspections should not occur on Sundays or public holidays, or any other day before 8am or after 6pm unless the tenant agrees. From 1 May 2025, a property manager/owner cannot enter the property more than twice in a seven-day period.

Western Australia

- **Written notice**

You must provide written notice of intention to sell to tenants. You can end the tenancy by giving at least 60 days’ written notice.

- **Eviction**

No eviction can occur for a fixed lease unless the lease is violated or both parties reach a mutual agreement.

- **Notice required for inspections**

“Reasonable notice required” is not defined in WA’s tenancy laws. It is generally taken to be that inspections can occur between 8am to 6pm on weekdays, and 9am to 5 pm on Saturdays, or any other time agreed to by both parties.

South Australia

- **Written notice**

You must advise prospective tenants if you intend to sell your rental property within two months of entering a new tenancy agreement, otherwise a tenant may terminate the lease. You must advise the tenant in writing within 14 days of entering into an agreement to sell. The property can’t be advertised or shown to prospective buyers until that time has passed. You can end the tenancy by giving at least 60 days’ written notice.

- **Eviction**

No eviction can occur for a fixed lease unless the lease is violated or both parties reach a mutual agreement.

- **Notice required for inspections**

Must provide at least 14 days’ notice before advertising the property for sale and give “reasonable notice” before each inspection. Seven to 14 days’ written notice is required for entry to the property for valuation purposes.

- **Time restrictions for inspections**

Inspections should occur no more than twice in seven days unless the tenant agrees. These should take place between 8am and 8pm Monday to Saturday for one hour unless the tenant agrees to other arrangements.

Tasmania

- **Written notice**

You must provide tenants with written notice of your intention to sell. If you do not wish to extend or renew the lease, a notice to vacate can be issued at least 42 days (but not more than 60 days) before the lease’s end date.

- **Eviction**

No eviction can occur for a fixed lease unless the lease is violated or both parties reach a mutual agreement.

- **Notice required for inspections**

48 hours’ written notice is required for inspections, which can only take place once a day on no more than five days in any week and only between the hours of 8am and 6pm.

Australian Capital Territory

- **Written notice**

You must provide written notice to tenants of your intentions to sell the property. A tenant can give 14 days’ notice to end the lease if the property is advertised for sale during the first six months of a fixed term lease. You can give eight weeks’ notice to end a fixed term lease if you intend to sell the property.

- **Eviction**

No eviction can occur for a fixed lease unless the lease is violated or both parties reach a mutual agreement.

- **Notice required for inspections**

You must provide 48 hours’ notice before inspections. Tenants can refuse access if they were not previously informed of the sale.

- **Time restrictions for inspections**

Inspections should take place between 8am and 6 pm, not on Sundays or public holidays, unless agreed to by the tenant.

Northern Territory

- **Written notice**

You must provide written notice to tenants of your intention to sell. 14 days’ notice is required to terminate a fixed lease at the end of its term, or 42 days’ notice for a periodic lease.

- **Eviction**

No eviction can occur for a fixed lease unless the lease is violated or both parties reach a mutual agreement.

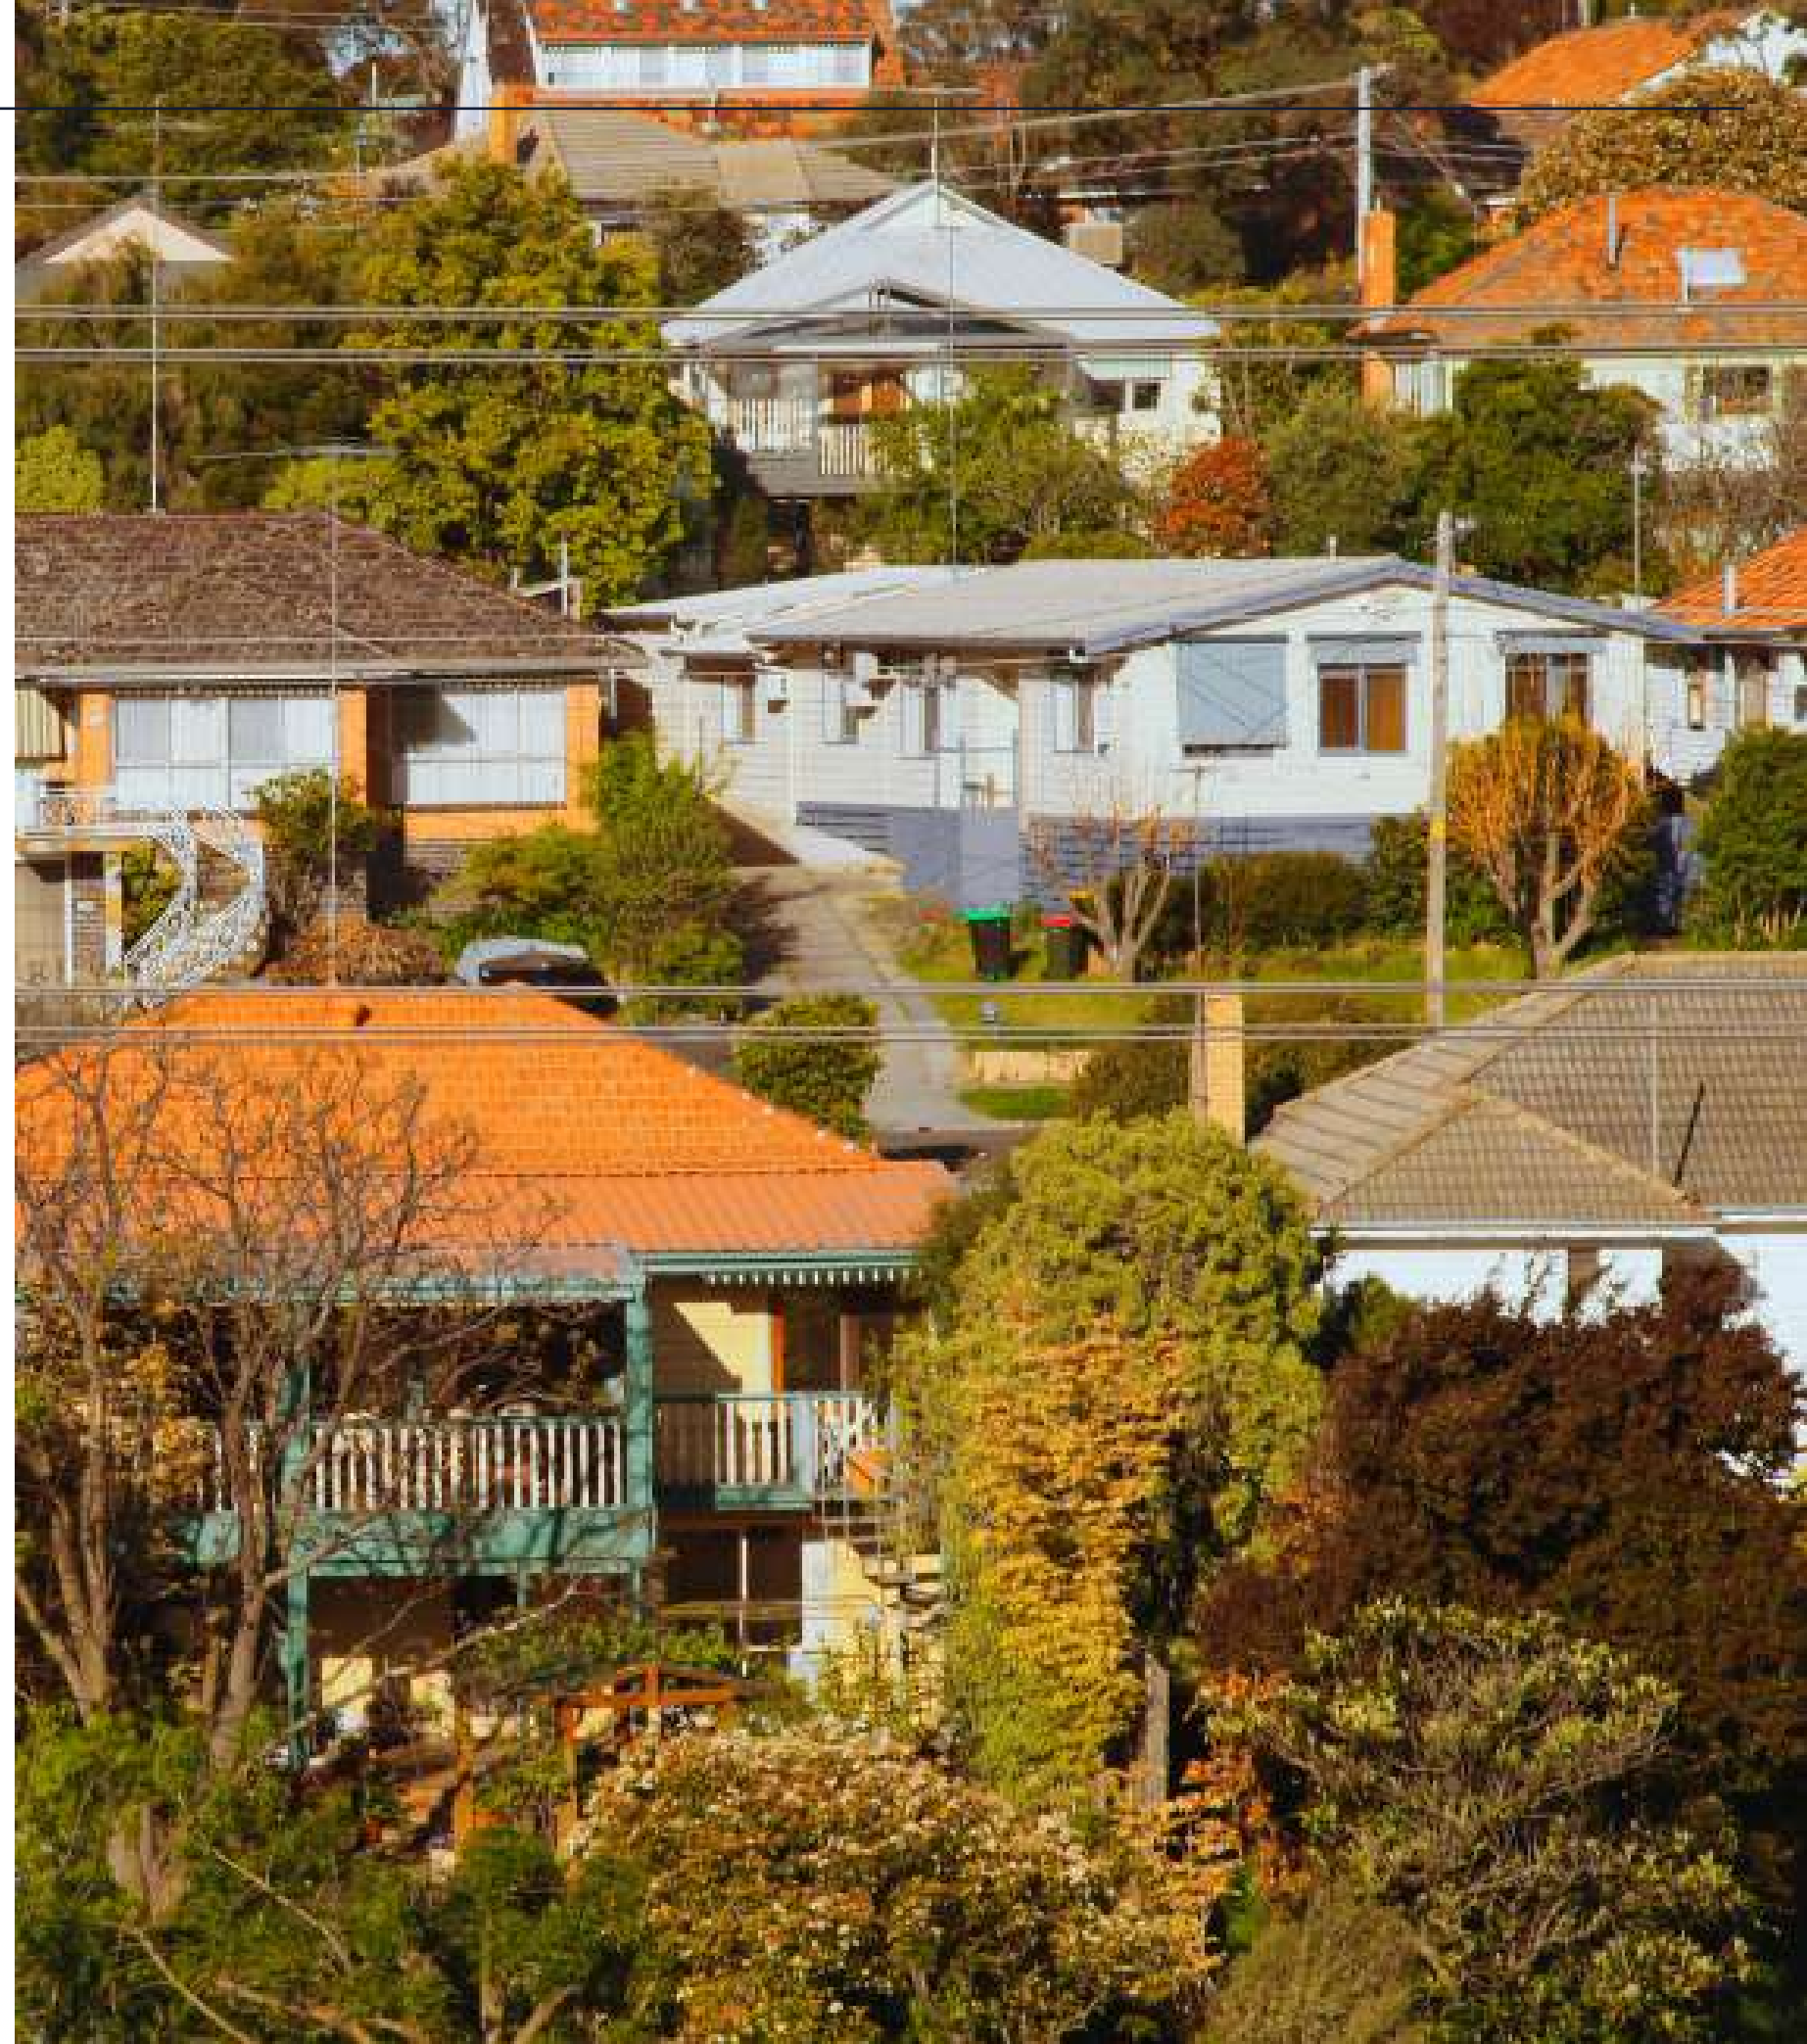

- **Notice required for inspections**

At least 24 hours written or oral notice for “a reasonable number of inspections” between 7am and 9pm. A tenant cannot unreasonably impede lawful entry in attempts to sell a property, while landlords should be sensitive to inconveniences to tenants. [YIP](#)

Gearing up *for change*

Negative gearing is a fixture in Australian politics, with calls to axe it cropping up time and again. But if the government finally pulled the plug, how would it shake up the property market and affect investors?

Denise Raward and Harrison Astbury report.

CURIOSLY, NEGATIVE GEARING IS NOT A TERM FOUND IN TAX TERMINOLOGY

but is commonly used to describe a situation where you borrow money to buy an asset and the expenses of owning it (including your interest payments) are more than the income you receive from it.

It applies to all asset types but is arguably most controversial in the context of housing where property investors can effectively reduce their tax bills by offsetting their losses against their taxable income.

Brief history of negative gearing in Australia

Allowing investors to claim tax concessions on their losses was a policy introduced in Australia in 1936, during The Great Depression, in a bid to encourage private investment in the country’s undersupplied housing stock. It remained in place throughout the post-war years when housing in Australia remained in short supply.

Over the ensuing years, negative gearing has been the subject of ongoing debate over its impact on housing affordability and its role in pitting home buyers against investors. It led the Hawke/Keating government to wind negative gearing back in 1985 by not allowing rental property losses to reduce tax on other sources of income. Interest and other expenses could only be offset against rental income.

But in the two years after negative gearing was abolished, a shortage of housing and escalating rents in some

Australian cities - not all - saw negative gearing reinstated to its original form in 1987. At the time, then-Treasurer Paul Keating suggested the abolition of negative gearing in 1985 had led investors to leave the rental market.

That brief experiment hasn’t stopped negative gearing again coming under the spotlight by subsequent political players. Labor took the policy to abolish it to the 2016 and 2019 federal elections but lost both. While such moves are seemingly off the table for now, the prospect of a hung parliament at the next election could easily see it back on the agenda in 2025 and beyond.

What would happen if negative gearing got axed?

Many economists say abolishing negative gearing is not the magic bullet in solving housing affordability as some pundits espouse. The vast majority say there needs to be a broad re-think of the entire taxation framework, not just one aspect of it, and that the main cause of the current housing affordability crisis is lack of supply, a far more complex issue.

We asked a range of experts and property industry figures would happen if negative gearing tax concessions were to be scrapped.

Short-term ‘fix’

AMP chief economist Shane Oliver said if negative gearing was to be axed, its impact on housing affordability would likely be only short-term.

“There would be an initial retreat from the market from investors at the margin.

Depending on how it’s applied, that will result in lower prices for a period.

“I suspect you might be looking at something like a 3-4% fall in prices which may then tempt some to declare victory. The problem is that I think that will be a short-lived benefit because having less investors in the market will mean a lower supply of rental property over time which will mean higher rents.”

Mr Oliver said this would eventually flow on to higher prices across the market as renters looked to buy and ex-investment properties were purchased by owner occupiers, with less incentive for investors to contribute to new housing stock.

“The short-term benefit could last a year or so but longer term, there would be higher prices because of less investor participation in the property market in terms of the supply of apartments and other housing. Investors play a key role in helping projects get off the ground.”

Mr Oliver said removing incentives for investors would ultimately decrease housing supply, the main driver of current housing affordability issues.

Impact on housing supply

Acting CEO of property industry company LocalAgentFinder Suresh Raghavan said that winding back negative gearing could have impacts on where investors want to place their money.

“One of the big benefits of negative gearing is that you take a loss, [but] you benefit a little bit from the deduction you make. But over the line, what many investors are hoping for is a capital gain

from that property.

“If not as much money is flowing into property because there’s not as much benefit from the tax deductions, there can be impacts on housing supply, there can be impacts on prices, there can be impacts on rental supply and prices, and all of those could indirectly impact an owner occupier as well.”

Mr Raghavan said there are currently 1.3 million Australians claiming a loss on their investment properties. That’s 62% of all investment properties owned in Australia, according to the latest data from the Australian Taxation Office.

“There’s a significant number of these properties that are out there and I think that’s what potentially makes it controversial. It’s a pretty big part of the investment landscape. And when we talk about investors, it’s not necessarily this little niche group of people, it’s everyone.

“A lot of people that you see at a barbecue, friends and family, will be investors, and because it touches such a large swathe of the population, I think that’s what has created some of this controversy and some of the strong opinions.”

A look into the crystal ball

Spectrum Financial Solutions principal Reid Swift said if axing negative gearing were to work, it would need to be ‘grandfathered’ so as not to affect existing investors and be the most “politically palatable”.

“Short term, there will be a downward pressure on house prices due to the reduced demand for property,” he said.

“This would be offset to a degree by a mini rush of property investors looking to secure a negatively geared property before the change.

“Longer term, I don’t expect negative gearing changes to have much of an impact on the property market.

“Market forces will prevail as supply meets demand. The banks’ credit policies and general housing affordability are far more influential long-term factors on the market.

“It must be remembered also that around two-thirds of property sales are to owner occupiers who won’t be affected by these changes.”

Mr Swift also said rents would rise due to upward pressure, and investors will hold onto properties for longer, causing a lower property turnover rate.

“Investors will always seek safe-haven

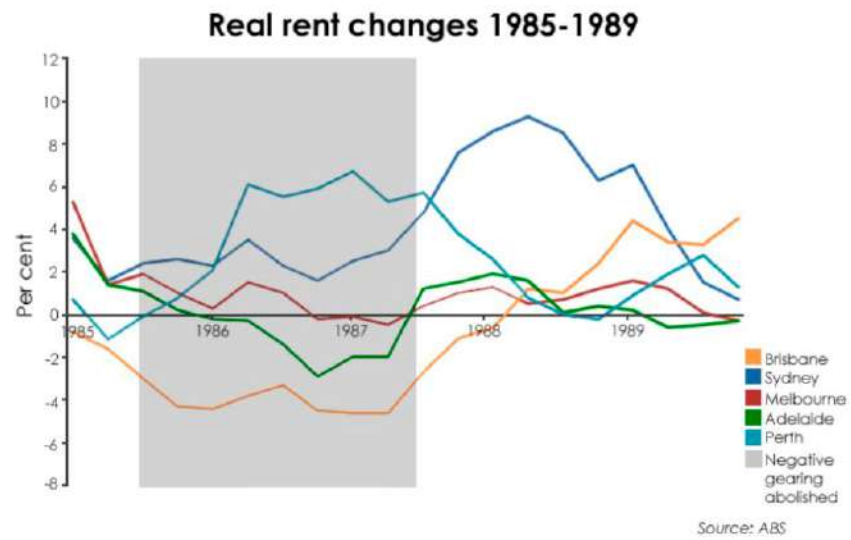

investments, like bricks and mortar, to include in their long-term diversified portfolios,” he said.

Increased rent argument ‘debunked’

However, CEO of the Tenants Union of NSW Leo Patterson Ross likens the commonly held belief among tenants that negative gearing helps keep rents lower is like Stockholm syndrome, as outlined in this blog post.

“Claims of [scrapping] negative gearing increasing rents during the 80s have been well and truly debunked over the years and bear no relation to the reality of what happened,” he said.

It’s worth noting here the abolition of negative gearing between 1985 and 1987 saw rents increase in Sydney and Perth but decrease in other major cities, as illustrated below:

➤ A federal submission to federal cabinet at the time said the evidence suggested local influence rather than tax measures had the greatest effect on metropolitan rental markets.

But Mr Patterson Ross said negative gearing has far wider reaching effects. “Negative gearing, by encouraging speculation and [landlords] taking on excessive debts, likely contributes to a decrease in [the availability of] lower rents and also decreases the political will to spend money on genuinely affordable housing.”

The Tenants Union says investors tend to look for properties with a strong prospect of capital gain, leading many to purchase relatively low-value, low-rent properties that they eventually put back on the market to turn a profit.

It argues as such properties are bought and sold, they eventually drop out of the rental sector and become scarcer, leading to more expensive prices at the lower end of the market.

As well, the Tenants Union says the committed negative gearist who finds themselves faced with the prospect of making money on their investment property is not likely to cut their revenue to keep posting a loss.

Instead, the Union says, they look to refinance, take on more debt, and buy another property.

Union analysis found the overall number of landlords had increased by 85% over the 15 years to 2017 with a growing proportion of them reporting a net loss. It also found there was a 400% jump in the number of people holding

six or more negatively geared rental properties, growing four times faster than those holding just one.

However, Mr Patterson Ross said the blame does not directly lie on negative gearing, rather its indirect effect in promoting the decline of affordable housing supply.

“Australia spends an enormous amount of money on this tax-delivered income support and, apart from the property owners who benefit directly or indirectly, we get little in exchange,” he said.

“[It is] worth noting also there are no requirements that negatively geared properties are of a good standard or that recipients follow good or even legal practice in their provision of housing.”

Who wears the cost of negative gearing?

Federal Treasury estimates showed rental property deductions were forecast to leap to \$27.1 billion for the 2023-24 financial year, up 58% on the 2020-21 figure of \$17.1 billion.

Rental property deductions cover expenses associated with “maintaining and financing property interests”, including interest and capital works expenses.

The inflated figure reflects the jump in interest rates with the cash rate surging from 0.1% in November 2020 to 4.35% during that three-year period, as well as the inflationary effect on other property-related expenses.

One figure, costed by the Parliamentary Budget Office, projects the fiscal cost of negative gearing will reach \$97 billion

over the decade to 2034.

As at October 2024, the ATO’s most recent data covers the 2020-21 financial year. In that year, around 2.25 million individual taxpayers (21% of all individual taxpayers) claimed deductions against rental income on a total of 3.25 million properties in Australia.

Of these, 47% negatively geared their properties, claiming a net rental loss. This is equivalent to just under 10% of all taxpayers.

In its latest submission on investor tax concessions in October 2024, the Australia Institute estimated negative gearing and the capital gains tax discount cost the federal budget around \$20 billion per year.

Negative gearing and home ownership in Australia

There has been much research into what role negative gearing may have played in declining home ownership rates in Australia.

The last census in 2021 found 67% of Australians were homeowners (32% without a mortgage and 35% with a mortgage) while 31% of the population were renters (26% from private landlords).

Overall, the home ownership rate had declined from 70% in 2006, a 3% drop.

However, the ownership rate among different age groups and income levels has varied markedly over that time.

Home ownership among 25-34-year-olds had dropped 14% in the 50 years to 2021, according to the Australian Institute of Health and Welfare analysis

of census figures.

Public policy thinktank Grattan Institute found the bottom fifth of the income scale in this age bracket have seen home ownership rates decrease from 63% to 23% as at the 2016 census.

What alarmed researchers was that data from the 2021 census also showed accelerating falls in home ownership among older and middle-income households over the previous five-year period.

While the Institute’s latest modelling suggested capping tax breaks for property investors would have minimal effect on home prices, it said it would help raise the rate of home ownership.

Separate modelling by NSW Treasury economists predicted reforms could raise the rate of home ownership by three percentage points, from 67% to 70% over the long term.

Grattan Institute’s Brendan Coates said possible changes to tax concessions for investors would help more renters to become homeowners. In practical terms, he argued it would effectively see first homeowners bidding against fewer investors at auctions.

Do other countries have negative gearing?

A number of other developed economies have some form of negative gearing in their taxation regimes, although all have slightly different variations.

Canada, Germany, Japan, and Norway have similar negative gearing rules to Australia although differences between the housing markets and other variables

make comparisons difficult.

In Finland, France, and the US, rental losses can only be offset against future rental income while homeowners in the US are also entitled to claim a tax deduction for the interest payments on mortgages on their own homes.

The New Zealand experience

New Zealand abolished its version of negative gearing (albeit not as generous as Australia’s tax concessions) in 2021 on existing properties, but did not apply the change to new builds.

However, negative gearing is to be reinstated in New Zealand in 2025.

Experts say it’s difficult to attribute changes in the country’s housing market to any one policy when the dominant force in the market at the time was likely rising interest rates.

However, overall, there was a decline in investors in the housing market as well as an uptick in first homebuyers.

But rents also increased substantially in New Zealand during that period although, again, there were other factors at play, including - like Australia - a migration boom.

Negative gearing on existing properties with full deductibility of interest expenses (against rental income only) will be reintroduced in New Zealand in April 2025.

It’s also worth noting New Zealand doesn’t have comprehensive capital gains tax.

Depending on what side of the fence you fall on - investor or would-be first home buyer - negative gearing can be

seen as a boon or a curse.

Potential home affordability solutions that have a reasonable chance of appeasing both sides include having a progressive approach to reduced investor tax deductions ushered in through a ‘grandfathering’ policy and lowering, or axing, state and territory government stamp duty.

Once you’re established in the property market, negative gearing can sound like an incentive to purchase another home for investment purposes. However, many experts - including critics of negative gearing - say it’s generally better to positively gear your property if you can.

Indeed, one recent study found changes to tax brackets and marginal tax rates meant 60% of property investors would be financially better off if they put their money into a superannuation fund instead.

But Australia’s love affair with property may prove difficult to dislodge.

For first home buyers, it’s easy to blame negative gearing as the sole reason for Australia’s home affordability issues. Yet many experts and analysts, from all sides of the political spectrum, acknowledge housing shortages and affordability issues stem from a more complex web of issues.

In the end, axing any type of preferential tax treatment that a large voter base has enjoyed for a long period is always going to be difficult and controversial. So far, proposals to dismantle negative gearing have not met with success at the ballot box, so it will be a bold government move to do it regardless. [YIP](#)

Your money story matters

Why your relationship with money is pivotal to your future financial freedom and four ways to rewrite it so you can start to make better money choices.

OUR EXPERT

ANISSA CAVALLO

is expert property adviser and founder of Eda Property

IN THE NEW TESTAMENT, THE TERM ‘MAMMON’ REFERS TO MONEY, MATERIAL WEALTH, OR ANYTHING THAT OFFERS THE PROMISE OF PROSPERITY.

It is often linked to the excessive or greedy pursuit of wealth. This concept is frequently misunderstood due to the misquotation of the Apostle Paul’s writings. While many believe he said, “money is the root of all evil,” what Paul actually wrote was, “the love of money is the root of all evil.” This distinction is significant, as it shifts the focus to our relationship with money rather than money itself.

My personal journey with money

During my time as a financial services executive, I was obsessed with making money. For me, money equated to connection - I believed that having it was the key to getting people to notice and take an interest in me. I vividly recall the moment this belief took hold as a young woman: I was at a bar with my friends, who I thought were prettier, better dressed, and more popular than me. They were trying to get some men to buy them drinks, but since I was already working and earning a good salary, I decided to buy my own drink—and a round for my friends and the men in the process. In an instant, I became the centre of attention. The feeling of being noticed and appreciated was exhilarating, almost intoxicating, and it took hold.

I used to earn money primarily to spend it on those around me, believing it would secure their connection and approval. My relationship with money was deeply unhealthy, driven by insecurity, and this pattern continued for years. It wasn’t until I lost everything during my marriage breakdown that I was forced to rethink how I approached money. Today, as a single mother of two, I’ve transformed my mindset. I now own 17 properties and view money as a tool to create more time and meaningful moments with my loved ones. Property investing has given me financial freedom,

and I’m passionate about helping others achieve the same.

Common money mindsets

As a property adviser, I see clients who:

1. Are afraid of making money because they don’t believe they deserve it. A mental barrier holds them back from asking for more, as they’ve never envisioned it as part of their identity or associated it with their sense of self-worth.
2. Believe they deserve money, but the truth is, none of us inherently do. I once had a client who, after starting a new job, immediately bought a brand-new car simply because they felt they “deserved it.” They sought instant gratification as a reward for their effort. What they didn’t realise is that what they truly deserve is financial freedom—a life where money becomes a tool to create time and opportunities for themselves, rather than just fleeting rewards.
3. Think having money means they are bad - that being rich means you are immoral and that not wanting wealth means you are pious.
4. Spend money to feel better - emotional spenders seeking a quick dopamine boost when faced with challenges in their lives. This escapist behaviour serves as a distraction, allowing them to avoid looking inward and addressing the underlying issues driving these compulsive habits.
5. Are afraid to spend, fearing a loss of control - often stemming from a lack of positive financial role models and the emotional impact this has had on their relationship with money.

I truly believe that this relationship we build with money comes from nurture, not nature, and we can unlearn habits. I have clients who are siblings and have the same job in the same industry, with the same income, but have made very different financial decisions: one has five investment properties, while the other is selling the home they purchased as they

can no longer afford it.

So if you have a poor relationship with money, how do you change it?

Identify what your relationship with money is

For two weeks, keep a diary of what you spend and why. Every time you buy something, write down why you are buying it and how it makes you feel.

Ask yourself what you feel the purpose of money is?

Is it to...

1. Buy things?
2. Survive?
3. Have choice?
4. Feel secure?

When I spend money, I feel

1. Thrilled then guilty – this means you may have a shopping addiction, or you may be making poor choices about money.
2. Worried, anxious – do you have a feeling that you need to hang on to money – are you scared of losing it?
3. Nothing – do you simply feel that money is a trading tool - something useful for trading goods and services? There is no emotion attached to your use of it.
4. Good, I am happy to pay for things and provide payment and reward – it feels like the right flow of energy...

Both of the last two perspectives are valid. One suggests a lack of deep consideration about money, perhaps not fully appreciating its value as a reflection of your own energy and effort. However, it also indicates that money isn’t controlling your life. The final perspective is ideal—it shows you take joy in spending on things you’ve thoughtfully planned for, demonstrating a balanced and intentional relationship with money.

Buy a property

I know, it’s easier said than done. But if you have a job and you equip yourself with the right knowledge and advice

about the market, you can get your foot on the property ladder. The only reason I started in property when I was 22 was because it was forced savings. Little did I know it was also forced capital growth. Purchasing a property teaches you about

1. Cashflow
2. Making money work for you through capital growth
3. Being responsible for a good debt versus bad debt and establishing a good credit rating
4. Leverage

Investing in property allows your money to work for you, creating opportunities for growth that saving alone cannot achieve. As I often say, you can’t save your way to wealth. The reality is that with each passing year, the purchasing power of the money you hold diminishes, making investment a crucial strategy for building long-term financial security.

Understand that your savings are not just a dollar amount

It is a representation of your energy and time, so much more than just their dollar value. It is your personal energy and is very precious. Don’t let it decrease in value each year.

Be accountable by sharing your account and spending with someone you trust

Justifying purchases to someone else is an effective way to prevent overspending and reduce impulsive buying decisions.

Ultimately, your money story is yours to shape. Whether influenced by fear, greed, or insecurity, your mindset around money directly impacts your decisions and your life. By recognising and reshaping this relationship, you can break free from harmful patterns and harness money as a tool for stability, growth, and fulfilment - transforming it from a source of stress into a powerful force for positive change in your life.

Cautious investors turn to private credit *as alternative pathway to property*

Private credit is emerging as a compelling alternative for cautious investors seeking stable returns and reduced risk in Australia’s volatile property market.

OUR EXPERT

TOM CRANFIELD

is the Director of Investment & Risk at Zagga

THE COMMERCIAL PROPERTY MARKET, ONCE A STALWART OF ATTRACTIVE RETURNS AND RELIABLE INCOME, has become a cautionary tale for many investors. Currently navigating a period of uncertainty, driven by high interest rates, fluctuating occupancy levels, and challenges within the construction industry, investors are understandably cautious when considering new

investment opportunities in the sector. While market dynamics have shifted, we are continuing to see strong demand and pockets of opportunity with commercial real estate debt filling a much needed role for investors and borrowers alike.

Caution with a side of optimism

The commercial property market today has been battered by high inflation, rising interest rates, and a challenging economic environment. This is especially true for assets that rely heavily on a robust economy to maintain occupancy and rental income. Larger-scale assets, in particular, have struggled, with cap rates easing and a decline in office tenancy putting pressure on yields.

Despite the overarching caution, there are sub-sectors within commercial property performing well. High-grade mixed-use commercial properties, boutique offices, small-scale industrial units, childcare centres, and non-discretionary retail outlets are all proving resilient. This performance is driven largely by Australia’s growing population and the corresponding demand for amenities and infrastructure.

In this climate, private credit has gained traction. The appeal lies in its ability for investors to still gain exposure to Australia’s burgeoning property market but in a way that combines regular investment returns with capital preservation that is particularly attractive in today’s volatile environment. It allows investors an opportunity to still access

these high-performing sub-sectors with significantly less risk and upfront capital than direct ownership or an equity stake.

Credit gains traction in times of volatility

The appeal of private credit for investors lies in its defensive characteristics, diversifying portfolios, reducing exposure to market volatility, and hedging against inflation. Borrowers are also seeing the benefits of this asset class, with three key dynamics driving demand for private credit among borrowers in Australia’s property sector.

Firstly, there is a substantial shortage in residential dwellings with building approvals stagnating despite significant population growth. This is placing pressure on the market and creating high demand, and opportunity, for developers.

Additionally, regulatory requirements have limited the ability of traditional banks to compete effectively in certain market sectors, such as construction loans, which has seen private credit managers, like Zagga, gain access to A-grade deals that traditionally have been the domain of the Big 4.

Finally, the need for agile and nimble financing has led to increased borrower demand for private credit solutions to help fill the gap, as it can offer a more tailored approach to lending.

The deal pipeline is strong and there is undoubtedly growing demand for private credit. Yet, it pays to be selective. Not every property or opportunity is created equal. The current period of

volatility requires investors to focus on the fundamentals, such as the strength of the market, the sector, the track record of the borrower, and the specifics of the loan. When considering private credit, the investment manager’s experience and track record is also critical. Being selective will help to ensure the investment delivers consistent, risk-adjusted returns in line with each investor’s investment strategy and return targets.

Demand remains for the long-term

Despite the challenges posed by current market dynamics and volatility, demand for quality housing and commercial assets in prime locations will remain. In Australia, this demand is significant, driven by steady population growth and insufficient supply. Climbing borrower costs and a strain on capital from traditional lenders will continue to fuel the rise of non-bank lenders and the demand for private credit.

Australian property remains a significant investment opportunity for local and foreign investors, however the way to invest has changed for good. This presents an opportunity for institutions, family offices and high-net-worth investors who are seeing the potential of private credit to provide an alternative pathway to property. One that delivers commerciality, attractive returns, and stable income, without taking on additional risk. [YIP](#)

Why overseas migration is not a major cause of Australia's house price growth

The narrative that overseas migration is the primary culprit behind Australia's rising house prices is one that often gets repeated, but it doesn't really stand up to scrutiny.

OUR EXPERT

BRETT WARREN
is a director of Metropole Properties in Brisbane

WHILE MIGRATION CONTRIBUTES SIGNIFICANTLY TO OUR POPULATION GROWTH, the impact on house prices is far more nuanced than many believe.

So before I dive into the real drivers of house price growth, let's set the record straight....

The benefits of migration: more than just numbers
Beyond the misconceptions about housing demand, it's important to recognise the significant benefits that overseas migration brings to Australia.
Migrants contribute not only to population growth but also to the broader economy, culture, and society.
They are an essential part of the fabric that keeps Australia dynamic and competitive on the global stage.
Economically, migrants are often younger and more skilled, helping to fill

critical labour shortages across various industries.
According to the Department of Home Affairs, skilled migrants make up about 70% of Australia's total migration intake.
This influx of skilled workers supports economic growth by boosting productivity and addressing skills gaps, particularly in sectors like healthcare, technology, and engineering.
For example, nearly one-third of Australia's doctors and over 20% of its nurses were born overseas, highlighting how migrants are crucial to maintaining and improving our public services.
Additionally, migrants are known for their entrepreneurial spirit, contributing to the creation of new businesses and jobs.
A 2020 study by the Centre for Policy Development found that migrants were nearly twice as likely to start a business as the Australian-born population.
These businesses not only create jobs but also foster innovation and drive competition, which benefits the economy as a whole.
Cultural and social contributions of migrants
Migration also enriches Australia's social and cultural landscape.
Migrants bring diverse perspectives, traditions, and skills that enhance Australia's multicultural society.
This diversity is reflected in the arts, cuisine, sports, and even in the way businesses operate.
It helps to foster a more inclusive and globally connected community, making Australia a more vibrant and attractive place to live.
Moreover, the presence of migrants supports the growth of international ties and trade.
As Australia looks to strengthen its economic relationships in the Asia-Pacific region and beyond, the multicultural workforce and business community play a pivotal role in building bridges with other countries, driving exports, and attracting international investments.

The relationship between migration and housing demand
While it's true that Australia has one of the highest rates of overseas migration among developed countries, this doesn't directly correlate with an increase in house prices.
Migrants tend to rent before they buy, and when they do buy, it's often years after arrival.
Data shows that only about 15-20% of migrants become homeowners within five years of arriving in Australia.
Instead, they settle in more affordable rental markets and typically occupy smaller, lower-cost dwellings, with a large proportion of them concentrated in just a few suburbs of major cities where others from their community live.
Unpacking the real drivers of house price growth
To understand why house prices have surged over the last few years, we need to look beyond migration and consider a broader set of factors.
While the supply/demand ratio is an important factor in house price growth, other factors include the availability of credit, local economic strength, consumer confidence, lifestyle trends, internal migration and the price of money.
Low interest rates:
Of course one of the most significant contributors to the recent surge in house price growth was the "once in a generation" property boom we experienced following a number of years of historically low interest rates that fell even further during the Covid pandemic.
Prior to the Covid years, interest rates were already low as the RBA tried to lift our inflation rate and then rates dropped to record lows, bottoming out at 0.1% in 2021.
This reduction in borrowing costs fuelled demand as buyers were able to access more affordable financing, driving prices up across the board.

Supply constraints:
A significant bottleneck in housing supply is a major factor behind the price hikes over the last few years.
Zoning restrictions, slow planning approvals, and limited land releases have created a chronic undersupply of housing.
For example, in Sydney, the average approval time for a new housing project can stretch from 5 to 10 years, causing a severe lag in supply that doesn't keep pace with demand.
Government policies:
Various government incentives have also played a role in inflating demand.
Policies like the First Home Owner Grant and stamp duty concessions have made it easier for buyers to enter the market, often without corresponding increases in housing supply.
These incentives have the effect of stimulating demand in an already tight market, further pushing up prices.
The real culprits
It's easy to scapegoat overseas migration when trying to explain complex economic issues like housing affordability, but it's clear that blaming overseas migration for Australia's housing affordability issues is a misdirection.
Instead, the focus should be on addressing the true drivers of house price growth, in particular supply-side constraints.
To make housing more affordable, policymakers should concentrate on increasing the housing supply, particularly in high-demand areas, and reforming planning laws to expedite the development process.
Migrants contribute far more to Australia than just a demand for housing.
They are a critical part of the economic engine, a source of cultural richness, and a driver of innovation.
Rather than viewing migration as a problem to be managed, it should be embraced as a key factor in Australia's continued prosperity and global relevance. [YIP](#)

NSW

Sydney remains prohibitively expensive for many budding buyers. Could regional New South Wales be an alternative solution?

TOWARDS THE BACK END OF LAST YEAR, CoreLogic numbers showed prices in Sydney declined slightly. The median house price dropped 1.6% over the December quarter, while units dropped 0.7%. Those numbers generated headlines, but the reality is those average prices remain \$1,471,000 and \$860,000 respectively. For many owner occupiers and investors, that rules out the majority of Sydney property. Even for those that can afford it, affordability issues could limit demand in the upper portion of the Sydney market.

Opportunities in NSW therefore may lie outside of the capital. According to CoreLogic, regional NSW has seen prices increase an astonishing 98.8% since 2014, more than any other city or region. The CommBank/Regional Australia Institute also shows a continual trend of Sydneysiders leaving, something Henry Single, Director of Pivot Property Buyers, has also noticed.

“We’re definitely seeing a fair bit of migration from Sydney up to Newcastle,” he told *Your Investment Property Magazine*.

He explained that recent developments have made it much more viable for people who work in Sydney to relocate to NSW’s second city.

“The NorthConnex [tunnel] I think has made a huge difference... you just funnel straight in off the highway and link up with the M2 and from there you can kind of go anywhere in Sydney, cut out Hills Road [notorious for bad traffic].”

NSW PRICE PERFORMANCE

AREA	TYPE	MEDIAN VALUE	QUARTERLY GROWTH	12 MONTH GROWTH	WEEKLY MEDIAN ADVERTISED RENT	GROSS RENTAL YIELD
Sydney	H	\$1,435,000	0.00%	6.10%	\$750	2.70%
Sydney	U	\$800,000	0.60%	2.60%	\$690	4.50%
NSW Country	H	\$745,000	1.40%	5.00%	\$550	3.90%
NSW Country	U	\$636,000	0.80%	3.30%	\$470	3.90%

CoreLogic. Data reported to the period ending October 2024. Median values account for sales transactions over three months.

Population growth in Newcastle is trending up, and Chad Dunn, another local buyers agent with AcquiredHQ, expects prices to rise accordingly this year.

“It’s now very hard to find a freestanding house under \$800,000 in the Newcastle region,” he told *Your Investment Property Magazine*.

“Even townhouses are starting to creep up to meet that bottom floor pricing which I believe will reach \$850,000 in 2025.”

CoreLogic data suggests the median dwelling value in Newcastle is now about \$923,000 (including units) after 5.2% growth last year.

Other regional hotspots

Not far behind Newcastle in the NSW population centre rankings is the Central Coast, another popular spot for buyers priced out of Sydney. In 2022-2023 Central Coast prices stagnated, but appear to be regathering momentum now. Suburbs like Killarney Vale and Hamlyn Terrace still have a median house price under \$1,000,000 for now, but that might change before too long if city-regional migration trends continue.

Mr Dunn says Port Stephens, just north of Newcastle, could be primed to be the state’s star performer.

“I think Port Stephens may take some of the shine off the Central Coast in 2025,” Mr Dunn said.

“Suburbs like Anna Bay, Boat Harbour, Soldiers Point, Fingal Bay and Corlette...are places I can see retirees and families continuing to relocate to, from areas as far afield as Queensland or Canberra.”

NSW’S HIGHEST YIELD SUBURBS

SUBURB SPOTLIGHT

Goulburn

Steady growth hub

GOULBURN PROUDLY WEARS ITS TITLE AS AUSTRALIA'S FIRST INLAND CITY, but don't let that fool you into thinking it's stuck in the past. It's a regional hub with a growing population, a strong sense of community, and a great balance of urban convenience and country charm. The train station makes it easy to get to Sydney or Canberra, while the local amenities—like shopping centres, schools, and health services—mean you don't need to travel far for everyday needs. Investors will appreciate its affordability compared to larger cities, and the steady demand for rentals from local workers and commuters alike.

source: realestate.com.au

GOULBURN HOUSES

Australia's First Inland City
Goulburn was officially declared Australia's first inland city in 1863.

Historic Railway Heritage
Goulburn is home to one of the oldest railway stations in New South Wales, dating back to 1869.

VIC

Victoria’s property market experienced a notable downturn in 2024, and experts aren’t expecting to see any significant turnaround in 2025.

OVER THE PAST 40 YEARS, Melbourne has been one of Australia’s strongest performing property markets. But in the past couple of years, its median home price has gone backwards, finishing 2024 with an annual loss of -3% according to CoreLogic data.

This compares with growth rates of 19% in Perth, 13% in Adelaide, and 11% in Brisbane.

Regional Victoria fared only marginally better with a -2.7% slip in property prices during 2024 with Victoria the only Australian state that saw its regional market go backwards.

So, what’s going on with Victoria’s property market? Australian property identity John McGrath believes the softer market may be in part due to the Victorian government’s decision to lower the land tax-free threshold for investment properties from \$300,000 to just \$50,000 from January 2024.

In a year where new investor lending by value soared nationally by 29.5% over the previous 12 months, Victoria recorded a considerably lower rate of 5.1%.

In October 2024, new investor listings accounted for 29% of the national total and were up more than 10% on the previous five-year average.

At the same time, investor listings were well below their historic averages in South Australia, Queensland, and Western Australia where home values have been rapidly rising.

According to Mr McGrath, Victoria remains at the “bottom of the pack for investor activity”.

While this has been good news for owner-occupiers looking to buy in the state, it’s also seen many former rental properties leave the market.

Mr McGrath said this reduction in rental supply is likely to have contributed to the city’s rent increases for 2024 (4% for houses and 4.4% for units) along with Melbourne’s continuing popularity among new migrants.

SQM Research’s ‘Boom and Bust Report’ for 2025 forecast Melbourne’s home values to fall between 1-5% over the coming year with most of the weakness expected in the inner-city ring.

However, SQM Research managing director Louis Christopher said if the Reserve Bank cuts interest rates mid-year by 25-50 basis points, as he anticipates, buyer demand may be stimulated, helping to stabilise price

falls. Domain’s chief of research and economics Nicola Powell said there may be a silver lining ahead for Victorian property investors. “I do think you’ll have a slice of investors that will be looking at Victoria as a market of opportunity,” Dr Powell told *Your Investment Property Magazine*. “What we’ve had in Melbourne is a market that has underperformed for the last two years, pretty much since around mid-2022, it’s underperformed relative to all other capital cities.” She said with an increase in Melbourne house prices since March 2020 of just 12.5%, the lowest of any capital city, it means value is building. “There is going to be a point in time where buyers see Melbourne as undervalued, and investors will be watching that,” Dr Powell said. She said investors looking to hold for the long-term may well see good capital growth prospects in the Victorian market, although it likely won’t be in 2025.

Named After a Revolutionary
Lalor is named after Peter Lalor, leader of the Eureka Stockade, a pivotal rebellion in Australian history.

Multicultural Melting Pot
The suburb is home to a diverse mix of cultures, reflected in its local cuisines and community events.

QLD

Beautiful one day, growing the next. After a year of solid performance in 2024, Queensland’s property market is forecast to keep climbing in 2025.

QUEENSLAND IS ONE OF THREE AUSTRALIAN STATES to see strong growth in home values over the last year, along with Western Australia and South Australia.

In January 2024, Brisbane’s median house price overtook Melbourne’s and then in May, outstripped Canberra’s, making it the second most expensive capital city for house prices behind Sydney.

Domain is tipping Brisbane’s median house price will hit the \$1 million mark this year with the state also forecast to have more million-dollar suburbs than Victoria by year’s end.

Already, the Gold Coast is now Australia’s second most expensive city market behind Sydney, with its median home price of \$1.02 million rising more than 80% since 2019.

But it’s still behind the median price of the regional Sunshine Coast, north of Brisbane, at \$1.06 million.

On a national basis, Queensland’s million-dollar suburb count is the fastest growing of all the states and territories, rising from just seven a decade ago to 174 by the end of 2024 - a growth rate of 25 times.

In the last calendar year, Brisbane’s median dwelling value grew 11.2% while regional Queensland saw growth of 10.5% with both markets at new peaks according to CoreLogic data.

Overall, the median cost of a home in regional Queensland is at a new peak of \$709,000.

Property experts widely believe growth in Queensland, albeit slowing, will continue to be driven by migration - both international and interstate - as well as lifestyle factors.

Queensland remains by far the most popular destination for interstate migration according to the latest Australian Bureau of Statistics figures.

Southeast Queensland is also continuing to benefit from major infrastructure projects in the lead up to the 2032 Olympic Games, generating employment and improving amenities across multiple localities and regions.

National property buyer Lloyd Edge, founder of Aus Property Professionals, believes there are significant opportunities for property investors in Greater Brisbane in the lead up to the Olympics.

QLD PRICE PERFORMANCE

AREA	TYPE	MEDIAN VALUE	QUARTERLY GROWTH	12 MONTH GROWTH	WEEKLY MEDIAN ADVERTISED RENT	GROSS RENTAL YIELD
Brisbane	H	\$893,000	2.60%	12.70%	\$620	3.70%

“Brisbane is Australia’s new world city with a thriving \$146 billion economy, projected to climb to \$217 billion by 2031,” Mr Edge told *Your Investment Property Magazine*.

“Billions of dollars’ worth of major infrastructure projects, either under construction or in the planning stage, are rapidly changing the face of Brisbane, helping to transform the city and attract many more businesses and people to move and call Brisbane home.”

Mr Edge says property values have historically skyrocketed in cities hosting the Olympics with significant boosts to global recognition, tourism, and both the commercial and residential property sectors.

“In Sydney’s case, data shows property values leapt 60 per cent from its 1993 bid win announcement up to the Games’ start in 2000,” he said.

For investors, he says some Brisbane apartments are offering attractive rental yields, around 5.1%, as well as the opportunity for strong capital growth.

Brisbane’s rental market remains tight with low vacancy rates - less than 1% - and this is not expected to shift significantly in 2025.

However, market watchers are reporting an increase in housing stock for sale in Queensland with the pace of price growth slowing.

As in Australia’s other high-growth states, Western Australia and South Australia, Queensland has seen prices in the bottom quartile experience the highest growth in value.

This indicates affordability will remain a major driver for potential buyers in the Queensland market even with the expected fall in interest rates during 2025.

Thornlands

Thriving coastal suburb

THORNLANDS IS ONE OF THOSE PLACES WHERE THE COASTAL LIFESTYLE MEETS FAMILY-FRIENDLY CONVENIENCE. It’s not exactly a quick trip to Brisbane’s CBD—about 40 minutes by car—but it makes up for that with its relaxed vibe and access to Moreton Bay. Locals love the green spaces, like the Eprapah Scout Environment Centre, and the schools here are a big draw for families. You’re close to Victoria Point for shopping, dining, and a cinema when you need it. For investors, steady rental yields and solid price growth make Thornlands a suburb worth watching.

Train to the City
Cleveland station is the nearest rail link if you’re heading into Brisbane for work.

Ongoing Development
Ongoing development and infrastructure upgrades mean Thornlands’ appeal is only set to rise.

WA

Western Australia’s scorching hot housing market has been the talk of Australia’s property sector in recent years and experts believe it still has some way to go.

PERTH’S MEDIAN HOME VALUE SAW A STAGGERING 19.1% GROWTH over the 2024 calendar year while regional WA also led the nation with 16.1% growth outside of Australia’s capital city markets, according to CoreLogic data.

But the end of the calendar year saw a slowdown in annual growth rates which, at their peak hit 24.7% in July for Perth and 19.3% for regional WA in September.

Property experts attribute the staggering growth to a number of factors including strong population growth, limited housing stock, affordable prices on a national basis, and the state’s stable economic conditions.

Although price growth in the Western Australian market is slowing, SQM Research managing director Louis Christopher forecasts another 14-19% growth in the Perth property market in 2025, conditional on a 25-50 basis point cut to the cash rate mid-year and Australia’s population continuing to grow by 500,000-plus.

Head buying agent of Perth-based Resolve Property Solutions Peter Gavalas also believes there is still growth to come in 2025.

“The fundamentals haven’t changed,” he told *Your Investment Property Magazine*.

“Perth is still one of the most affordable capital cities in Australia. Although the amount of income required to service a loan has risen, it’s sitting at a very affordable price in comparison to the local wages.”

WA PRICE PERFORMANCE

AREA	TYPE	MEDIAN VALUE	QUARTERLY GROWTH	12 MONTH GROWTH	WEEKLY MEDIAN ADVERTISED RENT	GROSS RENTAL YIELD
Perth	H	\$775,000	5.60%	23.10%	\$650	4.70%
Perth	U	\$535,000	6.50%	20.70%	\$600	6.30%
WA Country	H	\$499,000	2.30%	8.00%	\$600	6.60%
WA Country	U	\$365,000	2.90%	12.90%	\$570	8.50%

Source: CoreLogic. Data reported to the period ending October 2024. Median values account for sales transactions over three months.

Mr Gavalas said the Western Australian economy remains the strongest in the country with the lowest unemployment rate of all the states at 3.6% (as at November 2024) and the highest population growth (annual growth of 2.8% compared to 2.1% nationally as at June 2024).

“When it comes to supply, we are in shortfall of new homes required to meet demand,” he said. “This undersupply, in the short to medium term, will keep upward pressure on prices.”

In the investment market, Perth led the annual growth in capital city house rents for 2024 with an 8% increase over the calendar year and finished second behind Adelaide with an 8.7% jump in unit rents.

Mr Gavalas said he expects prices in the Perth metropolitan area to stay strong over 2025 as interest rates fall throughout the year, along with continued population and jobs growth that will see mid- to high-median priced suburbs do well.

“With the flow of increased assets values from the lower end of the market, 2025 will be a year for the upgrader buyers,” he predicted.

“People pushing into better areas, closer to the beach, river, or infrastructure, better school zones and safer suburbs.”

For regional WA markets, Mr Gavalas is expecting a strong showing from Geraldton in the north and Bunbury in the south.

“Geraldton and Bunbury gained strength over 2024 and are expected to grow well into 2025 as the lower median prices look very attractive to homebuyers and will keep attracting investors with attractive yields,” he said.

SA

South Australia’s property market has been galloping to peak price levels in recent years, with some experts predicting further double-digit growth rates will continue in 2025.

SOUTH AUSTRALIA IS BEHIND ONLY WESTERN AUSTRALIA in leading national home price growth over the past year.

The median dwelling value in Adelaide ended 2024 with an annual growth rate of 13.1% while regional South Australia saw 12.5% growth.

According to the latest CoreLogic data, the median home price in Adelaide is \$813,716, now the fourth highest of the Australian capital cities behind Sydney, Brisbane, and Canberra.

By December 2024, Adelaide had also overtaken the runaway Perth market to top the country’s quarterly growth rankings, with values up 2.1% in the December quarter compared with 1.9% in Perth.

CoreLogic research director Tim Lawless attributes this to the “extremely low” advertised stock levels in Adelaide, -34% below the previous five-year average as at mid-December.

As with other rapid-growth markets, it is the most affordable end of the South Australian market that has seen the highest growth in values.

The median house price in the northern Adelaide suburb of Elizabeth South recorded the highest growth rate of anywhere in Australia in 2024, taking just two years to double in value according to PropTrack data.

Its median house price leapt almost 57% in a year followed by the more expensive Adelaide suburb of South Brighton which saw a median house price gain of 52%.

The two South Australian suburbs left both Western Australia and Queensland’s growth hotspots in their wake.

Although property analysts widely forecast growth will slow in 2025, SQM Research managing director Louis Christopher predicts the Adelaide market will climb another 8-13% over the next year, depending on broader economic conditions.

PropTrack forecasts home values across South Australia (not just Adelaide) will grow by 3-6% in 2025, on par with the Western Australian

market, with the two states continuing to lead the nation in home price growth.

PropTrack’s Property Market Outlook Report, December 2024, also showed Adelaide had recorded the highest value growth of any state over the past five years, with home prices up 80.9%.

It compares to an average growth across Australia’s combined capital cities of 43%.

University of Adelaide property academic and consultant Peter Koulizos said Australian Bureau of Statistics data concurs that Adelaide has been the best performing capital city over the last 20 years.

For investors, Adelaide units recorded the highest annual growth in rents (9.2%) of any capital city in 2024 and the third-highest annual rental growth for houses at 6.1% for the year, according to CoreLogic data.

Mr Koulizos said South Australia’s property market will continue to see capital growth in 2025 although it won’t be as significant as the last four years and much of the growth will occur at the more affordable end of the market.

“The South Australian economy and property market will be significantly influenced by three main themes in 2025: infrastructure, defence, and international students,” Mr Koulizos said.

“Infrastructure continues to generate significant employment, as does the growing defence industry. International student numbers have not been capped in South Australia as they have in most parts of Australia, which is great news for South Australia as international education is one of the greatest income generators for the South Australian economy.”

He said buying property in South Australia remains a good option - if investors have a long-term focus.

“The South Australian economy will continue to grow from strength to strength, which means employment opportunities will be very good, which in turn will underpin a strong property market,” he said

TAS

Are there any bright spots in the generally stagnant Tasmanian market?

AS OF JANUARY, CoreLogic data suggests no capital city in Australia is further from its all time peak property price than Hobart. The Tasmania capital has an average dwelling price of \$650,000, which is down 12.6% from its March 2022 peak. It’s much the same elsewhere on the emerald isle; at \$523,000 the average dwelling price in regional Tasmania is 11.5% lower than in May 2022. There hasn’t been too much to shout about in Tasmania for a while. Flick back through recent editions of this magazine and you’ll find iterations of the same sentiment, and Junge Ma, senior analyst at Investorkit, says the new year hasn’t changed much.

“In Hobart, most suburbs continue to experience market pressure relief and price decline,” she told *Your Investment Property Magazine*. Nevertheless, with interest rate cuts potentially on the horizon there is always the possibility of a rapid turnaround. Hobart also has what CEO and founder of PropertyBuyer.com.au Rich Harvey calls a “unique lifestyle appeal.”

“Hobart’s green credentials are a big drawcard,” he said. The rental market is another marker that could give hope to investors. Hobart managed to pretty much avoid the rental boom entirely throughout 2023, but rent prices are now increasing for both houses and units, showing there’s still plenty of demand for a place to live in the capital.

Where to look? If you’re convinced that Hobart might spring an upset in 2025, Ms Ma suggests looking north. “Our [suburb tips] are located in the north-east and north-west regions, characterised by either low supply or affordable prices that help counteract market challenges,” she said.

TAS PRICE PERFORMANCE

AREA	TYPE	MEDIAN VALUE	QUARTERLY GROWTH	12 MONTH GROWTH	WEEKLY MEDIAN ADVERTISED RENT	GROSS RENTAL YIELD
Hobart	H	\$689,000	-0.70%	-1.50%	\$540	4.00%
Hobart	U	\$500,000	-1.90%	-2.80%	\$470	4.70%
TAS Country	H	\$510,000	-0.90%	-0.90%	\$450	4.50%
TAS Country	U	\$440,000	1.80%	2.40%	\$385	4.70%

Source: CoreLogic. Data reported to the period ending October 2024. Median values account for sales transactions over three months.

One example is Moonah, north-east of the CBD heading towards Glenorchy. It was one of the few Hobart suburbs to go against the grain last year and see the average price increase, and Ms Ma says it’s poised for another strong performance this year.

“Moonah house prices are demonstrating strong resilience compared to many other suburbs in the city,” she told *Your Investment Property Magazine*.

“Housing inventory is now at a balanced level of 2.9 months, slightly lower than this time last year.”

Alternatively, Geilston Bay was particularly strong in the second half of last year, with house prices gaining more than 5% from August to December. Ms Ma attributes this to sharply declining supply, which could also bode well for 2025.

“Stock on market [in Geilston Bay] has dropped by over 30% over the past year...there’s now only 1.1 months worth of stock available,” she said.

Rokeby, New Norfolk and Blackmans Bay are other Hobart suburbs tipped for a big year.

For investors looking outside of the capital, regional Tasmania significantly outperformed Hobart in 2024, with the median dwelling price increasing 3.6% through the year.

Six regional SA3s saw positive annual growth, with Burnie-Ulverstone the standout at 7.9% through the year. Launceston also saw prices increase by 5.5% to reach a median price of \$543,000. Notably, that brings it above Brighton and North West Hobart, two of the capital’s strongest performers. That suggests it isn’t just affordability driving demand in Launceston, so it could be poised for further attention from buyers if a rate cut cycle begins.

SUBURB SPOTLIGHT

Sandy Bay

Waterfront living with long-term potential

SANDY BAY IS ONE OF HOBART’S MOST DESIRABLE SPOTS, offering the perfect mix of waterfront living and easy access to the city. It’s a place where the hustle and bustle of the city feel far away, but you’re still just a short drive from everything you need. The suburb has been through a bit of a price dip recently, but don’t let that put you off—Sandy Bay’s long-term appeal and scenic views keep it in high demand. Whether you’re after a place with character, or an investment that could appreciate in value over time, this spot ticks a lot of boxes.

Prime Views

You won’t find many places with better views than this, especially along the waterfront looking over the Derwent River.

Quiet but Central

You’re just a stone’s throw from Hobart’s CBD, but the atmosphere here is all relaxed, with a lot less noise.

NT

Persistently low supply could mean more moderate growth for the Northern Territory in 2025.

THE START OF 2025 MARKS MORE THAN A DECADE SINCE THE GLORY DAYS OF PROPERTY IN THE NORTHERN TERRITORY. According to CoreLogic, almost every other capital city and ‘rest of’ market has seen the median dwelling price increase by at least 50% over the past ten years. The weakest performing capital (Melbourne) has still seen prices go up by 49.3% since 2014. Darwin on the other hand has seen property prices go down 3.4% in the past ten years, now 6.4% cheaper than the peak of May 2014. Regional NT has seen an even more pronounced decline, down 11.5% from the highs of April 2016.

Could this year be the year things finally get going again? As any true gambler would say, might Darwin and the NT be ‘due’ a boom? Campbell Wright, Research Analyst at PRD, isn’t convinced, but he thinks the NT might still enjoy some growth in 2025.

“Limited housing supply, ongoing demand for affordable property and high construction costs are expected to maintain stability and drive moderate price increases over the long term,” he told *Your Investment Property Magazine*.

He said the pipeline of new properties being constructed in the NT, while increasing, remains “constrained”.

“Over the year to October, residential building approvals in the Northern Territory showed only a modest increase of 2.8% following a prolonged period of underperformance,” Mr Wright explained.

“This was one of the weakest growth rates compared to other Australian jurisdictions...limited supply will likely exacerbate price pressures

over medium to long term.” If you’re on the hunt for the next Perth though, a sudden surge in demand for property in the NT appears unlikely anytime soon. “The Northern Territory is not projected to experience the same level of population growth as other states, with migration flows expected to normalise over the forward period,” Mr Wright said. “Interstate arrivals are expected to return to historic levels, while overseas migration is forecast to decline slightly from elevated post-pandemic levels.”

Target affordable properties? It might not be time just yet for Darwin and the NT’s next stint in the spotlight, but there could still be growth opportunities for savvy buyers. PRD numbers suggest affordability is a priority among NT buyers at the moment. Over 2024 house sale numbers remained steady, while unit sales went up 9.8% compared to 2023. So far this has yet to translate to price growth - unit prices in Darwin declined 0.5% last year per CoreLogic - but Mr Wright says it demonstrates “buyer preference for affordability”.

Following this logic, he pointed out the areas where property is cheaper that could be the ones to target in the NT this year.

“Focusing on areas such as Karama, Lyons and Durack could be particularly advantageous due to their affordability and potential for capital growth,” he told *Your Investment Property Magazine*.

“These suburbs benefit from strong community amenities and access to employment hubs.”

SUBURB SPOTLIGHT

Gillen

Affordable living with reliable returns

IF YOU’RE LOOKING FOR A BIT OF SPACE WITHOUT PAYING A FORTUNE, Gillen is where you’ll want to be. It’s a laid-back, quiet part of Alice Springs, just a short drive from the centre of town. The prices have dipped a bit recently, but that’s actually a good thing if you’re after something more affordable. You’ll find everything you need here—local schools, parks, and a few cafés, plus easy access to main roads for getting around. There’s always plenty of outdoor space, and it’s a great area for families who want to be close to town but don’t want the noise and hustle of it all.

\$310,000	-7%	2%	23%	7%

Source: CoreLogic. Data reported to the period ending October 2024. Median values account for sales transactions over 12 months.

Room for Growth
Even though the market’s been slow recently, units have grown by 23% over five years.

Popular with Renters
Thanks to the affordable prices and good rental yields, Gillen is a favourite with renters.

ACT

Growth in the ACT remains unremarkable but there could still be investment opportunities in the capital.

CANBERRA IS ANOTHER MARKET that looks a little weak heading into 2025. House prices increased just 0.7% through last year, while units declined 2.9% according to CoreLogic. The median price is now \$852,000 which is 6.5% down from the peak of March 2022.

There’s no consensus on whether the ACT will regather any momentum this year either. KPMG Australia are predicting the median house price in Canberra will increase 6%. On the other hand, the ‘base case’ scenario for SQM Research is that Canberra will see the largest drop in dwelling prices of any major city - it says prices could drop between 2% and 6%.

The timing and extent of any RBA rate cuts could be the deciding factor. That base case scenario from SQM is based on a 25-50 basis point rate cut halfway through next year. If the first rate cut falls instead in the first quarter of the year, the SQM prediction shifts instead to prices growing between 2% and 6%. Along with Sydney, Canberra is the city with the widest spread of possible outcomes between those two scenarios in SQM’s ‘Boom & Bust’ Report. There could be safer spots to invest, but there could still be significant potential in Canberra if the chips fall the right way.

Ms Ma suggests looking to the south of the city. The Tuggeranong region runs from Kambah and Wanniasa down to Tennent and the start of Namadgi National Park. According to the most recent census data, it’s home to about a fifth of ACT residents.

ACT PRICE PERFORMANCE

AREA	TYPE	MEDIAN VALUE	QUARTERLY GROWTH	12 MONTH GROWTH	WEEKLY MEDIAN ADVERTISED RENT	GROSS RENTAL YIELD
Canberra	H	\$950,000	0.10%	-0.80%	\$650	3.60%
Canberra	U	\$586,250	0.00%	-0.80%	\$570	5.00%

Source: CoreLogic. Data reported to the period ending October 2024. Median values account for sales transactions over three months.

“In Canberra, our focus is on the Tuggeranong region, where house prices remain relatively affordable and show strong resilience against the challenges of high interest rates,” Ms Ma told *Your Investment Property Magazine*.

She picked out Banks, Gowrie, Condor and Calwell in particular as Tuggeranong suburbs with particularly promising growth fundamentals with median house prices below the Canberra average. All three have low or declining levels of stock on market - and all have seen prices start to increase in recent months. For investors with a little more spending power, Macarthur has a median house price closer to \$1 million, but still with similar growth prospects.

Other hotspots

Outside of Tuggeranong, the north west of Canberra is another spot tipped for growth.

Samuel Powell, property analyst at Hello Haus, highlighted the 2615 postcode, on the north west border with New South Wales.

“Dunlop has a strong rental yield, low vacancy rate, low stock on market and high auction clearance rate...[making] it likely to outperform the Australian average growth rate of approximately 5%,” he told *Your Investment Property Magazine*.

Holt in the same postcode is a slightly more affordable alternative with “strong socioeconomic indicators and low supply levels,” per Mr Powell.

SUBURB SPOTLIGHT

Narrabundah

Long-term growth

NARRABUNDDAH IS ONE OF THOSE SUBURBS IN CANBERRA that seems to balance everything perfectly. You’ve got leafy streets, a relaxed vibe, and yet, you’re still close to all the action. The suburb’s grown quite a bit over the past few years, and while the prices for houses have levelled off recently, they’re still on the up in the long run. Narrabundah’s got a bit of everything—parks, cafes, and solid schools. Plus, you’re just a short drive to the CBD and major transport links. It’s a peaceful place, but not too far from the buzz of the city, making it a solid spot for both families and investors alike.

Leafy Charm

Narrabundah is known for its green spaces and tree-lined streets—perfect for those who love a bit of nature without leaving the city.

Neighbourhood Vibe

It’s a great mix of old and new, with charming older homes alongside some modern developments.

■ **Vacancies 12 mths ago**
Is the number of rental properties that were unoccupied and being advertised for rent 12 months ago.

■ **Vacancy rate 12 mths ago (%)**
Is ‘vacancies 12 mths ago’ divided by total rental dwellings 12 months ago, expressed as a percentage. By comparing this number with the current vacancy rate, you can see if the rental market has improved or worsened from the landlord’s point of view.

■ **Current vacancies**
Is the number of rental properties currently unoccupied and being advertised for rent. Be aware that this number may be high simply due to there being a high total number of rental dwellings in that suburb.

■ **Current vacancy rate (%)**
Is current vacancies divided by total rental dwellings, expressed as a percentage. A vacancy rate of 3% is considered balanced and anything less than 2% would suggest that renting out a property in that area is easier. A vacancy rate of more than 4% is considered high and would suggest that renting out a property in that area is more difficult.

STOCK ON MARKET

This section provides an important insight into the availability of both houses and units in more than 3,000 suburbs across Australia – in other words, how easily you could buy a property in that suburb if you’re looking to invest, and how easily you could sell a property you already own in that suburb if you’re looking to cash out. SOM is compiled by realestateinvestar.com.au and *Your Investment Property Magazine*.

Data is the most up to date available at time of publishing – October 2024. Suburbs are listed numerically by postcode, lowest to highest.

■Current houses

Is the number of houses currently being advertised for sale. A high number could mean you’ll have plenty of choice if you’re looking to invest, or conversely plenty to compete against if you’re looking to sell. Some suburbs have hundreds of houses for sale, others none at all.

■Current units

Is the number of units currently being advertised for sale.

■Houses 12 mths ago

Is the number of houses that were being advertised for sale 12 months ago. By comparing this number with the number shown under ‘Current houses’, you can see how the level of housing stock has changed over the year. A high increase in housing stock could indicate more supply coming into the market, and a drop could mean the market is tightening.

■Units 12 mths ago

Is the number of units that were being advertised for sale 12 months ago.

■Change (%)

Is the change in the total number of houses and units that are currently being advertised for sale compared to the total number 12 months ago, expressed as a percentage. A positive figure would typically mean the market has more stock coming online due to seasonal factors such as the spring selling season or new housing developments in the area.

PRICE GUIDE

This section provides comprehensive statistical information on price movements for houses and units in more than 5,600 suburbs. Designed to keep you fully informed on market activity across Australia, the Property Price Guide is compiled by Core-Logic RP Data, Australia’s biggest property data provider, and *Your Investment Property Magazine*.

Data is the most up to date available at time of publishing – October 2024. Suburbs are listed by state/territory, then alphabetically.

HOUSES	229
New South Wales	230
Victoria	258
Queensland	273
Western Australia	269
South Australia	304
Tasmania	314
Northern Territory	318
Australian Capital Territory	361

UNITS	303
New South Wales	303

Queensland	343
Western Australia	352
South Australia	355
Tasmania	359
Northern Territory	360
Australian Capital Territory	361

■ **Median price (\$’000)**
is calculated by compiling all the property sale prices in a suburb during the past 12 months and then taking the middle figure. It is a good measure to detect changes in the market by way of price movement.

■ **3-mth growth (%)**
is the percentage change in the median price over the last three months, and is a good short-term indicator of whether property prices in that suburb are currently rising or falling, although this can be volatile in nature.

■ **12-mth growth (%)**
is the percentage change in the median price over the last 12 months, and shows how the market has moved over the medium term. Anything over 10 would represent very strong growth.

■ **Average annual growth**
is the average percentage change in the median price over the last 10 years, expressed as a per-annum figure. This statistic irons out the shorter-term peaks and troughs in the market to give a good measure of long-term market performance. Anything over 7.5 would indicate exceptionally strong growth (more than a doubling in price over the full 10 years).

■ **3-yr growth (%)**
is the total percentage change in median price over the past three years. Anything over 25 would indicate exceptionally strong growth.

■ **5-yr growth (%)**
is the total percentage change in median price over the past five years. Anything over 40 would indicate exceptionally strong growth.

■ **Weekly median advertised rent (\$)**
is the median weekly asking rent for listed rental properties over the last 12 months, expressed as a simple dollar figure. It is the best way to compare rental income in different suburbs.

■ **Gross rental yield (%)**
is the estimated gross rental return, calculated by multiplying the weekly rent by 52 weeks then dividing it by the median price. Beware that the rental yield goes up when the median price falls, so an increasing rental yield is not always good. You will ideally have rising yield on the back of rising prices. A gross yield of around 6 allows for both strong cash flow and growth.

■ **Vendor discount (%)**
is the average difference between the initial asking price and the final selling price.

■ **Average hold period**
is the average number of years owners hold their properties before selling. A number over 10 indicates a tightly held suburb in which stock on the market is often low; a number below five indicates a suburb with rapid turnover. A high number also suggests an area is dominated by homeowners and a lower number by investors. Typically, growth in tightly held suburbs is consistently strong over the long term and suburbs with shorter hold periods are generally more volatile.

■ **Number sold**
is the total number of houses/units sold in the suburb over the last 12 months. The number will be heavily influenced by the total number of dwellings in the suburb, so bigger suburbs tend to have higher sales and smaller suburbs could only have a handful. It also depends on the stock available in the market. So if there are only a few properties up for grabs in a suburb,

naturally there will be fewer sales as well. This means you should not take this data in isolation but use it in conjunction with the other statistics to get a better picture of how active that suburb’s market is.

■ **Days on market**
is the average number of days a property stays on the market in that suburb before it is sold. A lower number indicates that properties are highly sought after and quickly snapped up by buyers. A high number could mean low interest from buyers either due to unsuitable pricing or undesirable property offerings. Buyers are often turned off by properties that have been sitting in the market for longer than the average, which is three months. Typically, vendors become desperate when the property spends a long time on the market, which means buyers are in an ideal position to negotiate a hefty discount.
