EDITOR'S LETTER

Ready, set, recession?

WE'RE BACK WITH ANOTHER JAM-PACKED EDITION OF THE MAGAZINE!

As we navigate through these uncertain economic times, it is essential to ensure that your investment property portfolio is recession-ready. In our feature article, we provide you with expert advice on how to prepare your portfolio for any potential economic downturns.

With the rental crisis continuing to affect many Australians, there has been much debate over the effectiveness of rental caps. We delve into the QLD rental caps and explore whether they are a viable solution to the current rental crisis.

For those considering building their own investment property, project management can seem like a daunting task. So, we provide a step-by-step guide on how to successfully project manage your own build.

The Australian Taxation Office (ATO) has recently announced a crackdown on property investors, after a recent audit discovered errors in 90% of tax returns. With tax time fast approaching, we provide you with tips on how to avoid getting a knock on the door from the ATO.

We also have an exciting article on how to invest in property overseas, exploring the benefits and potential challenges of investing in international real estate markets.

Enjoy the issue!

No signs of relief for tenants as vacancies linger at lowest levels

AUSTRALIA'S RENTAL MARKETS continue to be a great ordeal for many tenants — vacancy levels remained at the lowest level of 0.8% for the fourth month in a row.

According to Domain Research, the record-low vacancy rate was driven by both capital cities and regional areas, which both posted vacancy rates below 1% at 0.8% and 0.9%, respectively.

Interestingly, however, many capital cities posted a slight gain in vacancy rates — only Darwin reported a tightened vacancy rate from 0.9% in March to 0.7%.

Overall, vacant rental listings are down 18.2% annually, driven by the drops in Sydney and Melbourne.

While most capital cities are starting to see improvement in rental listings over the year, they all remain "firmly locked in favour of landlords."

Capital cities hit strongest annual rental gains in April

THE RENTAL MARKETS ACROSS AUSTRALIA'S CAPITAL CITIES have witnessed the biggest annual growth in April, driven by the surge in overseas migrants and international students and the fall in rental listings.

CoreLogic's national dwelling rental index recorded an 11.7% annual growth across capital cities, the highest level on record. Overall, Australia's rental index increased 0.8% monthly, 2.8% on a three-month basis, and 10.1% annually in April.

According to CoreLogic, the mismatch between the supply and demand continues to be the main driver pushing rents in capital cities.

In fact, the total supply of rental listings in capital cities was down 20.9% over the four weeks to April compared to the same period last year. Compared to the five-year average, rental listings were 39.8% lower.

This means that vacancy rates were also low — except in Hobart and Canberra. Vacancy rates across capital cities remained well below the 3% to 5% average.

ACT unveils build-to-rent-to-buy scheme for low-income women

LOW-INCOME WOMEN IN THE ACT facing rental stress and risk of homelessness will be given a chance to have a roof above their heads with the first Build-to-Rent-to-Buy pilot program.

The initiative is a joint venture among the National Housing Finance and Investment Corporation (NHFIC), the ACT Government, and Community Housing Canberra (CHC).

The Build-to-Rent-to-Buy pilot program aims to deliver up to 22 affordable rental dwellings for vulnerable women in Strathnairn, Canberra.

The homes will be a mix of up to three-bedroom dwellings for long-term rentals. Women who are selected for the initiative will have the option to buy the home at the end of the 10-year lease.

Regional suburbs outperform capital cities in Q1

LATEST MOVEMENTS IN THE MARKET seem to show a stronger demand for housing as supply remains limited, with conditions in regional areas receiving increased attention from potential homebuyers.

According to CoreLogic's latest report, there were signs of market improvement in the past few weeks:

- Capital city clearance rates have held above decade average for six of the past eight weeks.
- Vendor discounting improved, from a trough of 4.4% in December 2022 to 4.2% in March 2023.
- Home values are starting to trend higher, with the daily home value index lifting 0.9% since early March.
- The uplift in dwelling values has flowed through to around 35% of suburbs analysed in the March quarter.

Among the 25 best-performing suburbs in the first quarter of 2023, 20 are in regional Australia.

Among regional areas, South Australia, Northern Territory, and Western Australia showed the highest share of suburbs with rising values over the March quarter at more than 70%.

Across capital cities, Perth achieved the highest proportion of suburbs with rising values at 57.3%. Following behind is Sydney with 43.9%.

Rent increase limits – are they really the answer?

Rental increase limits are not an entirely new thing in Australia, but recent changes in Queensland have ignited a debate on whether these caps can truly help alleviate the rental crisis. **Gerv Tacadena** reports.

THE PLIGHT OF RENTERS AND ASPIRING TENANTS worsens by the day as the crisis continues to hound Australia's rental markets. For Queensland, a possible solution is to limit the ability of landlords to increase rents.

Queensland Premier Annastacia Palaszczuk announced in late March that the state — following existing policies in other states — will be capping rental price increases from once every six months to once a year.

The new annual limit for rent increases will apply from 1 July 2023 for residential tenancies and rooming accommodation agreements.

Ms Palaszczuk said this move is a "wake-up call" for investors to do the right thing for tenants, who are already struggling with skyrocketing living costs.

"We must act and will act to deliver reforms that balance the rights and interests of Queenslanders who rent and property owners to sustain healthy rental supply," she said.

The move was met with criticism from industry experts and property groups, with the Real Estate Insitute of Queensland calling it a "blazing red flag" for property investors.

But what could the change really mean to the market?

Short-term relief, long-term woes

For many experts, the change is a short-term relief to tenants and could potentially cause more harm than good in the long run.

Festoon House managing director and Damien McEvoy co-owner Matt Little said rent limits do not provide a sustainable solution to ending the rental crisis.

"Limiting rent increases may result in the exit of landlords from the market, a decrease in the number of rental properties available, and an eventual rise in rental prices over the long term," he told *Your Investment Property Magazine*.

Mr Little said it is crucial to strike a balance between protecting tenants from excessive rent increases and ensuring landlords are able to maintain and invest in their properties.

"A system in which landlords are only permitted to increase rent if they can demonstrate that they have made significant improvements to the property could be one potential solution — this system would link rent increases to the condition of the property," he said.

PRD Real Estate chief economist Dr Diaswati Mardiasmo said while the move is, in a way, a very objective response, it does stop or limit one side of the investment financial equation, which is income.

"Investors impacted would be those who have been doing six month leases, which admittedly there was an increase of due to the tight rental market," she told *Your Investment Property Magazine*.

Dr Mardiasmo said landlords continue to bear higher costs, including body corporate fees, mortgage repayments, council rates, utilities, and fees for insurance, maintenance, and property management.

"If we look at the equation between income and cost, we can already see it is quite imbalanced – hence the notion of negative gearing during tax time," she said.

"With the income stream limited, this balance deepens, and investors may choose to exit the market as it is no longer financially viable — in the current rental market this does more damage than good."

Speaking from the tenants' perspective, Everybody's Home spokesperson Maiy Azize said while limits to rental increases are good, the key is making sure rules are enforced.

"Without real, enforceable limits on rent increases, we will see more and more people from all walks of life plunged into housing stress and poverty," Ms Azize told *Your Investment Property Magazine*.

➤ "Landlords might say that rent limits are unfair, but the real victims are renters — they have been smashed by skyrocketing rents in Australia's broken housing system for years without reprieve."

"Investors can write off losses on tax or pass them on to tenants, but renters pay through the roof or find themselves with no home."

Meanwhile, multilist.com CEO Jarinda Wilson said imposing the rental caps is a positive move by Queensland to make a fairer system.

"Rental increases must be tempered by real market value, not on a self-perceived fluctuation to the marketplace by landlords and agents," she told *Your Investment Property Magazine*.

Ms Wilson said agents and landlords who overprice their rental properties would ultimately realise that it is a false economy of scale.

"Raising your rent by 20% or $100 a week, but having it left vacant for a month quickly erodes any perceived or real profit when a 10% rise would have had the property occupied immediately," she said.

"Sometimes, tenants pay over the marketplace value in their desperation to find a home — unable to sustain it, they soon fall behind. The agents and landlords cannot remove the tenants and they get stuck in a difficult cycle that they cannot extract themselves."

Rental limits in other states

Rent limits are not something new — many states already have policies in place to limit either the frequency or amount of rent increases.

New South Wales, Victoria, South Australia, and Tasmania have existing rules in place limiting the frequency of increases to once a year.

There are also other policies imposing a specific limit on the percentage of rent increases. For instance, landlords in the ACT are not allowed to increase rents by more than 10 percentage points above the annual inflation rate. So at an inflation rate of 7%, ACT landlords can only increase rent in a single year by up to 17%.

Most states also have varying requirements for the length of notice a landlord must provide before implementing a rent increase. For example, Victoria requires 60 days' notice, while New South Wales and Queensland require at least 30 days' notice.

Dr Mardiasmo said the influx of interstate investors was one of the major reasons why the Queensland government decided to change the rules on rent increases.

"The rationale is having similar policies makes it easier for investors with multiple properties in different states — the benefits of standardisation so to speak," she said.

"Overall, the recently imposed rental cap in Queensland might sound scary. In reality, however, the change is already almost business as usual."

Will it ever be fair to introduce rent limits?

Still, Dr Mardiasmo said rental caps can have negative consequences especially when introduced in non-optimal economic conditions.

"A rental cap has more of the desired impact when the economic conditions allow for it, which is an economic condition that is relatively static. Right now, our economic conditions are anything but static," she said.

"Mortgage repayments, infrastructure costs, council rates, body corporate costs, and other fees are not static — they are not stopping. And all of these costs fall on the landlord, which is passed through to renters."

Dr Mardiasmo said for a rental cap to be viable, there is also a need to cap the costs borne by landlords.

"The issue that landlords have is balancing income and costs, to ensure that their investment is financially viable; thus, any assistance or policies that create a lower cost environment will, technically, also translate to lower rent," she said.

For rent limits to favour both landlords and tenants, there are some perspectives to consider. Linking rent limits to inflation is one, as it will help ensure that rent increases remain in line with the overall cost of living.

This approach can protect tenants from excessive rent hikes while allowing landlords to adjust rents according to economic conditions.

A regular review and adjustment of rent limits based on current market conditions can also help guarantee their relevance and effectiveness.

Lastly, Dr Mardiasmo said rent control policies must strike a balance between protecting tenants from excessive rent increases and safeguarding landlords' rights to a fair return on investment.

How deep in the rental crisis is Australia?

Census records show that a third of Australian households depend on rental accommodation.

Roughly 96% of the total rental pool of 3.3 million properties is funded by everyday Australian investors and the rest are government funded.

Propertyology head of research Simon Pressley said the intensity of the crisis means that only around 32,000 properties were advertised for rent across the country as of the end of February 2023.

"Looking back 13 years earlier, when 4.5 million fewer people lived in this country, there were 43,559 properties advertised for rent," he told *Your Investment Property Magazine*.

This is not to say, however, that population growth is the problem, Mr Pressley said.

For him, the series of regulatory restrictions on investors that started in 2015 triggered the series of events that ultimately led to a sharp and consistent reduction in rental supply.

"While population growth was not the cause of the dire shortage of rental supply, the fact that there is such a shortage means that a perfect storm is now ready to erupt, with the biggest population boom in our nation's history unfolding over the next couple of years highly probable," he said.

Mr Pressley said it would be hypocritical to punish the supplier of rental accommodation.

"Capping the price to rent and restricting fundamental controls of asset ownership discourages people to fork out their hard-earned money, diminishes one's preparedness to accept financial risks, and creates a level of rage which is now nearing boiling point," he said.

"Australia needs a lot more investors, not less — until that happens, tenants will have no choice other than to compete hard for the limited rental supply offered by the shrinking number of landlords."

Coming up with a fair solution to the rental crisis

For Mr Little, there needs to be a combination of short-term and long-term policies to solve the rental crisis.

Government subsidies for affordable housing, incentives for property developers to build more affordable rental properties, and the introduction of rental assistance programs for low-income earners are some of the potential solutions.

"We additionally need to address the basic monetary and social factors that add to the rental emergency, like pay disparity and the absence of reasonable lodging choices for low-pay workers," Mr Little said.

Dr Mardiasmo also shared possible short-term solutions to the rental crisis, including temporary rental assistance and strengthening tenant protection.

"Governments can provide short-term rental assistance or subsidies to those in need, helping to bridge the affordability gap for low-income households and preventing homelessness," she said.

"Implementing policies that protect tenants from eviction without just cause and providing resources to tenants for legal assistance and mediation, can help ensure stability in the rental market."

Another idea is to allow longer stay in temporary accommodation such as caravan parks, with the number of charges paid taken into account as the ability to pay, which Dr Mardiasmo said, is almost like a rental referral or rental balance sheet.

"More often than not these stays are limited to a certain period of time, which creates uncertainty for the tenant and also hinders them from having an address for rental applications," she said.

The concept of house-sharing can also help, especially for those tenants who don't have stable finances. For instance, households can rent out their spare room to students or young professionals. VIP

LONG-TERM SOLUTIONS TO THE RENTAL CRISIS

PRD Real Estate chief economist Dr Diaswati Mardiasmo said solving the rental crisis involves policies in five main areas:

Affordable Housing Stock – Public-private partnerships, social housing projects, and incentives for developers can expand the construction of affordable housing units.

Land use and zoning – Reviewing and reforming land use and zoning regulations can encourage higher-density development and the construction of diverse housing types, making more efficient use of urban land and increasing the availability of affordable housing options.

Tax Policies – Implementing changes to tax policies that encourage the development and maintenance of affordable housing, discourage property speculation, and promote equitable distribution of housing resources can contribute to long-term housing affordability.

Diversifying Housing Stock – Policies reducing red tape and encouraging innovative measures such as Build-to-Rent and Asset Repurposing can introduce new types of housing supply.

Incentivising Landlords – Offering tax incentives, grants, or subsidies to landlords who can provide affordable housing or who maintain rents at a reasonable level can encourage the availability of affordable rental properties.

Want to go it alone? Here's how you can project manage your own build

With builders collapsing left, right, and centre (and unfortunately, taking people's money with them), investors have found a new way around this: project managing their own builds. **Hanan Dervisevic** breaks down how it works and why it can be an attractive alternative option.

PROJECT MANAGING YOUR OWN BUILD doesn't necessarily mean constructing a home single-handedly, brick-by-brick (unless you want to be Bob-the-Builder). But, it's also not an easy job to undertake either.

With the recent collapse of Porter Davis Homes, investors and owner-occupiers alike have become increasingly fearful of putting all their trust and money into builders. This has driven the emergence of a well-known (but not-so-new) trend, project management.

Director and Group Acquisitions Manager at ➤

➤ Apollo Investment Nic Alessio said with too many building companies going broke, mum and dad investors who want to grow wealth through property are looking into project managing their own builds.

"People are fed up having to place their trust and funds in building companies that take their money and then go broke only to reappear a few months later under a new brand name," Mr Alessio told *Your Investment Property Magazine*.

"Many people have had bad experiences with builders so it makes a lot of sense now that people are engaging, essentially project managers to handle their investments for them."

Undertaking a building project can often be a demanding and complex journey if you're unsure how the process works. However, you don't have to project manage the build alone - you could enlist the help of an experienced professional if this is the path you're willing to take.

A rundown of the project management process

If you're planning on going down this route, there are generally two options you can take: do it yourself (you are the project manager) or hire an experienced expert to take care of the build for you. Neither option involves hiring or putting all your trust in a building company to do all the work from A to Z.

Instead, you or an experienced project manager are completing all the necessary roles to complete the build the construction company would usually do. This includes, but is not limited to:

- Managing/supervising the site
- Seeking the required council approvals
- Ordering materials
- Sticking to the budget
- Ensuring the work meets building regulations and standards
- Obtaining and complying with a building permit
- Providing a safe work environment
- Hire and supervise any contractors working under you (make sure they're licensed and insured)
- Finding a block of land
- Construction drawings
- Design process
- Job site progress updates

Managing timelines, budgets, approvals, contracts, and tradespeople can take its toll if you're doing it alone and, depending on the size of your project, may even require taking time off your regular job.

You may also need to obtain an owner-builder permit if you want to undertake or supervise a building project (depending on the state you live in). For example, if your project is valued at more than $11,000 in Queensland, you must have a permit approved.

So, if you prefer a more hands-off approach, it may be worth hiring a project manager to oversee your entire build.

What does a project manager do?

For those investors who are wanting to do developments that have gone and tested the waters and realised, 'oh hang on, this is a bit more than I can chew', you can hire a professional.

Mr Alessio said the first conversation he has with a client is notifying them they are completely hands-off with the process.

"A project manager should manage the entire process from start to finish. This includes coordinating the involvement of all third-party service providers including managing the builder, finding the most ideal block of land, managing planning approvals, and arranging the finance to fund the project, to name a few," he said.

"When sourcing a builder for a client, I reach out to the 200-plus builders in my network to see who has what in their range and whether they will be the right fit for the client or not. As long as the build is going to represent great value for money for the client, that's who will be assigned the build.

"From there, a project manager will ensure everything is on track for success."

One thing that is still required from the client's perspective is engaging a solicitor to handle all the legal steps involved when purchasing a property. A solicitor will generally review all necessary documents to successfully complete the transaction and minimise the risk of deadlines and key dates being missed.

When explaining the role of a project manager, Mr Alessio used a simple analogy. A project manager is like the sun, while all the people they work with such as builders, land developers, and tax agents are planets in the solar system that revolve around the sun. Essentially, a project manager is a facilitator..

What is the benefit of having an experienced expert to assist you in this process?

After successfully appointing a project manager for his first investment property, Philip Fourie stuck to his guns when building his second investment in Wyndham Vale, Victoria.

"When we first moved to Australia, we went to the banks and got shut down as unfortunately, they just look at you as a number," Mr Fourie told *Your Investment Property Magazine*.

"From there, we decided to have a chat with a project manager and it seemed like the dream was reachable.

"Within four weeks, they had a block of land for us, got us a competitive financing deal, and got the ball rolling."

Here's a rundown of how a project manager may benefit the build of an investment property:

- ***Industry knowledge*:** With a wealth of industry knowledge, a project manager's sole focus is to deliver the best possible outcome for your build. They can recommend the type of investment property you should build by conducting market research, focus on the 'big picture,' and also keep the project on track.
- ***Easy communication*:** Act as a liaison between developers and contractors. They provide a point of contact for questions/concerns for you and all those connected to the build.
- ***Control build costs:*** They will work on your behalf to ensure the project stays within your allocated budget and monitor this throughout different stages.
- ***Keeps your project on time:*** Manage timelines, hours, and deadlines to ensure the project is on target. This is not to say the project won't experience any delays. However, a project manager will ensure you're informed and work out the best way to get the build back on its original timeframe.
- ***Manages problems that may arise:*** A project manager should have solutions ready for both expected and unexpected problems.

Mr. Fourie said hiring a project manager provides you with a personal one-on-one experience you wouldn't otherwise receive with a big building company.

"It is an extremely stress-free and easy process," he said.

"A project manager takes everything into consideration about what your needs are as a client and how they can accommodate you. They give great advice on how not to overextend yourself."

Mr Alessio said a project manager is there to get the best deal and outcome for the client.

"Project managing your own build is not difficult, it just requires having the right support and assistance from experienced people," he said. YIP

THE 6 QUESTIONS INVESTORS SHOULD BE ASKING A PROJECT MANAGER BEFORE HIRING

When sourcing a project manager, you could ask potential candidates the following questions:

1. How are you paid? Are you paid a commission or are you charging me a fee for service?
2. How many projects have you completed before?
3. What is your experience? How are you qualified to be a project manager to manage the build on our behalf?
4. Have you ever experienced any problems with projects you've managed? If so, how have you dealt with them?
5. How much contact do you have with your clients? How accessible are you in terms of communication?
6. How do you prioritise tasks on a project?

Batten the hatches: How to ensure *your property portfolio is recession ready*

The outlook for the Australian economy in the coming months and years is uncertain, at best. **Harry O'Sullivan** has turned to the experts to discover what property investors can do to prepare their portfolio for the worst.

WHEN IT COMES TO SETTING INTEREST RATES, the RBA faces the challenge of carefully navigating between slowing down the economy sufficiently to curb inflation, while also avoiding the possibility of plunging it into a second recession this decade..

Inflation remains well above target levels, while the 2022/2023 rate hiking cycle is the fastest since the 1990s. There have been some positive signs in recent months that we'll be able to avoid a recession, but the possibility continues to lurk.

For millions of Australians, sustained economic down periods pose the threat of unemployment or homelessness, so investors who are likely to have the capital to safely absorb adverse economic conditions without these sorts of risks don't tend to be high on people's sympathy lists.

However, those with significant asset portfolios still have reason for alarm. As a shareholder, even if you have unshakeable faith in the durability of the business you are invested in, recessionary times bring down confidence in everything, so the whole share market inevitably takes a solid hit. It's the opposite of the rising tide that lifts all boats.

Property investors are not immune from these concerns. House prices tend to drop during recessions, while there's also a greater risk of tenants defaulting on rent. No matter whether your investment portfolio consists of a single-bedroom unit or several properties, you should be prepared for the possibility of tough times to come. We spoke to several property experts to discover what investors can do to insulate their investment portfolios from deteriorating economic conditions.

Diversify with commercial property

Chief Economist of PRD Research, Dr Diaswati Mardiasmo says broadening the types of property you own is a good way to mitigate the impact of an economic rough patch.

"Owning both residential and commercial properties can provide some insulation against a downturn in one sector," she told *Your Investment Property Magazine*.

If you haven't taken the plunge into commercial property, the annual rental yield on assets like warehouses or office blocks is often relatively higher than residential properties, although the higher prices could be a barrier to entry. Investing with partners or a consortium is usually how newbies break into the commercial game. However, Dr Mardiasmo warned caution was necessary before taking the plunge.

"Properties that are primarily used for travel or entertainment, such as hotels and Airbnbs, may struggle during a recession as people cut back on discretionary spending," she said.

"In addition, businesses that rent office space may reduce their footprint or go out of business altogether, leading to higher vacancy rates in commercial buildings."

If your portfolio currently consists exclusively of units and houses, your investor brain might be telling you diversification sounds like a no-brainer, making sure you have at least some eggs outside of the residential basket.

Commercial investing carries its own set of risks though, so you'll need to make sure you are rigorous in your market research. Consulting a buyers agent that specialises in commercial property could be a good way to help you navigate your way through new territory.

Seek out recession-proof properties

Some of you reading this won't have the capital to leverage large commercial ➤

properties, or perhaps you have a steadfast conviction that sticking to residential property is the way forward. People will always need shelter, after all, so you could argue homes are likely to be as recession-proof as an asset can be.

Whatever the reason, should you want to stay residential, there are a bunch of things you should be looking for when seeking properties resilient from adverse market conditions.

Scott Aggett, Founder and Expert Property Negotiator at Hello Haus, says there are several things that can indicate whether a property will hold up better during a recession.

Proximity to major employment hubs

One of the biggest reasons recessions are so daunting is that inevitably, people lose their jobs. As spending goes down, businesses have to lower their output, which often leads to staff layoffs. This can have a knock-on effect on the rental market.

Imagine a rural town where most of the residents are employed at a mine, that has to cut staff. The people that lose their jobs will likely need to pack up and look for work elsewhere, which, as you can probably guess, brings down rental yield and property values.

Suburbs close to areas with lots of work - business districts, for example - are better suited to navigate these situations. Tenants in these areas are more likely to quickly find alternative jobs, which helps to protect against a mass exodus of displaced employees.

Low vacancy rates

This one speaks for itself really. A prolonged spell without tenants is one of the most unfortunate things that can befall a property investor, so you want to reduce the chances of that happening to you. A low vacancy rate means more people want to live in your suburb, so it's less likely that you won't be able to find someone to pay you rent. Suburbs with a healthy excess demand in normal periods have more of a buffer when times get tough.

Positively (or close to it) geared property

There are all sorts of things that could trigger a recession, but this is the most likely scenario in the coming months: inflation persists at well above target levels, leading the RBA to continue raising interest rates until many households and businesses can't take it anymore.

In this case, property investors are stuck with high mortgage repayments as the economy tanks. The RBA is likely to bring rates down in a desperate attempt to stimulate spending once again, but the damage could have been done.

As Simon Pressley of Propertyology has pointed out, the average Australian investment property owner in 2022 saw annual losses balloon out by more than $11,000. A strong cash flow that can absorb elevated interest payments can be a good defence against running into large deficits if rates don't go down.

Renovation upside potential

Mr Agget's final point is for investors to remember they are not simply price takers who have to accept whatever the market value of their property is. Developing and renovating is essentially a means to manufacture equity. If you choose a property that you will be able to make extensive improvements to, you have the option to boost value during down periods. You could look for properties with a small land-to-asset ratio, with plenty of room to add a garage or a swimming pool. A big part of this is also making sure you'll be allowed to make the renovations when the time comes, so you'll want to check zoning laws and try to get a sense of how likely your plans are to be approved.

Don't over-leverage

As a property investor, you're probably one of the wealthier people in Australia, so a recession isn't likely to mean destitution. No matter how well off you are though, a recession can affect us all. There are some consequences of a recession that can be unavoidable no matter how far in advance you prepare, so it's important that you aren't sitting on too precarious a pile of assets. Dr Mardiasmo advocates being conservative with the amount of debt you take on.

"During a recession, property values may decline, making it more difficult to refinance or sell properties," Dr Mardiasmo told Your Investment Property.

"Investors who are highly leveraged may face difficulty servicing their debt and may be forced to sell properties at a loss."

Minimising your debt-to-asset ratio, perhaps through refinancing or more considered acquisitions, is worth thinking about.

'Get on with it'

If you're a property investor nervous about a recession, Simon Pressley has a simple message for you: don't panic.

"From a property market perspective, worrying about whether the nation has two consecutive quarters without economic growth is akin to putting off booking a week's holiday because it might rain during one of those seven days. Get on with it," Mr Pressley told *Your Investment Property Magazine*.

Lest we forget, March 2021 marked the end of the fourth quarter in a row the Australian economy declined after the various lockdowns and Covid shenanigans. As Mr Pressley points out, this didn't exactly sink the property market.

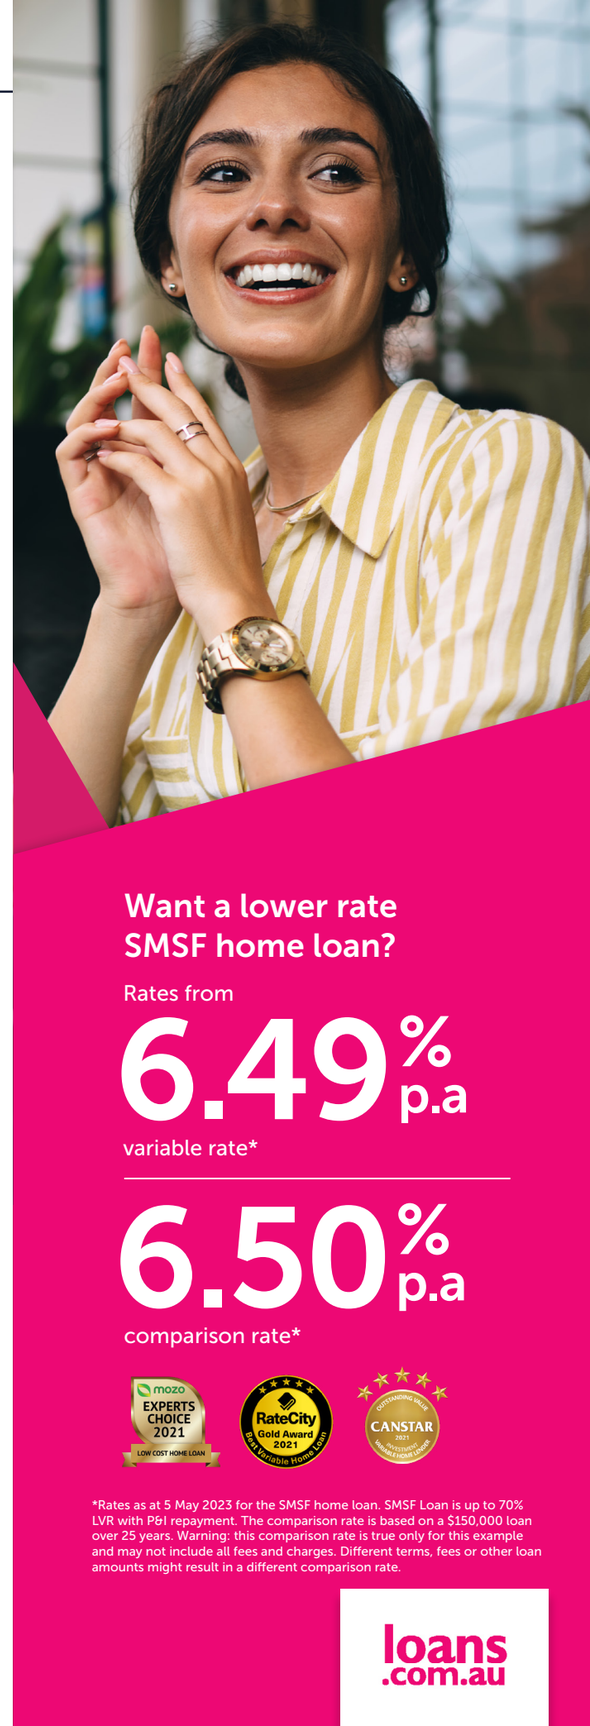

"Whilst we went into recession, the national response produced an economic boom, along with the second biggest calendar year growth in real estate values in our lifetimes."

Any property investor who ignores market conditions completely is likely to run into problems, but there's a reason why we say 'safe as houses'.

Property investing in itself is one of the best ways to protect your asset portfolio; houses are an 'essential commodity', as Mr Pressley puts it.

Scott Aggett said that for some people, a recession could actually present a chance to expand their portfolio.

"[Hello Haus] likes to take the contrarian investor view and look at these times as a great opportunity to buy high-quality assets at a discounted price - think of it like shopping on Boxing Day," Mr Aggett told *Your Investment Property Magazine*. YIP

A landlords' guide to *avoiding a knock at the door* this tax season

With another tax season looming, 90% of landlords across the 2020–2021 tax reporting period prepared incorrect tax returns, requiring adjustments to net rental income. To avoid potential pitfalls or issues arising this tax reporting period, industry professionals have weighed in to help you put your best foot forward. **Jacob Cocciolone** reports.

TAX CAN BE A COMPLICATED MESS FOR THE AVERAGE PUNTER, let alone a landlord with multiple investment properties. That said, there is a difference between completing a tax return incorrectly and simply hiding income and expenses from the eyes of the Australian Tax Office. In fact, landlords have come under fire in recent times for continued issues of non-compliance with false claims resulting in inflated tax returns. ➤

H&R Block Director of Tax Communications Mark Chapman

➤ ***H&R Block Director of Tax Communications Mark Chapman*** said one of the ATO's main focuses this year will be on people who make deduction claims in relation to investment properties and holiday homes.

"The ATO recently announced that in a series of audits, they found errors in 90% of returns reviewed," Mr Chapman told *Your Investment Property Magazine*.

So, this year, expect them to focus on the following:

1. Claiming excessive interest expenses, such as where property owners have tried to claim borrowing costs on the family home as well as their rental property.
2. Incorrectly apportioning rental income and expenses between owners, such as where deductions on a jointly owned property are claimed by the owner with the higher taxable income, rather than jointly.
3. Claiming deductions for investment properties that are not genuinely available for rent.
4. Claiming repairs for newly purchased rental properties. The costs to repair damage and defects existing at the time of purchase or the costs of renovation cannot be claimed immediately. These costs are deductible instead over a number of years or are added to the cost base of the property for CGT purposes. Expect to see the ATO checking such claims and pushing back against claims which don't stack up.
5. Incorrectly treating properties that are rented out to friends or family at a discounted rate. This will be regarded as a non-commercial rental. The income will still be taxable but you'll only be able to claim deductions up to the amount of rent you've received. You won't be able to make a loss; if you were relying on negative gearing, that isn't a desirable outcome!

Carbon Accounting and Tax Partner Michelle Maynard

Carbon Accounting and Tax Partner Michelle Maynard noted some landlords and property investors will receive 'please explain' letters from the ATO within weeks of returns being lodged.

"When the ATO reviews your claims, at this time they can ask for receipts and explanations," Ms Maynard told *Your Investment Property Magazine*.

"If they determine that you have incorrectly claimed a deduction, or not included the correct amount of income, there are three things that will happen.

"The tax payable will be assessed and will be backdated to the original due date; interest will be payable from that initial due date; there may be a penalty of up to 75% of the shortfall tax if the ATO can prove you intentionally disregarded the law."

What can landlords claim this tax season?

Mr Chapman says of the various items of expenditure that you might incur in running a rental property, probably the most significant is the amount you pay on your mortgage.

"The interest element of your mortgage repayment is deductible for tax purposes," Mr Chapman said.

"In addition to interest relating to the property acquisition, you can also claim a deduction for interest on loans taken out to: carry out renovations; purchase depreciating assets (for example, furniture); make repairs or carry out maintenance." ➤

MARK CHAPMAN'S LIST OF ITEMS TO CLAIM IN YOUR 2022-2023 TAX RETURN

There are a number of items you can claim in your tax return, some more obscure than others. If any of these apply to you, make sure you include them in your tax return:

- Advertising for tenants, including costs passed on by letting agents
- Cleaning at the end of a tenancy (including removal of rubbish)
- Estate and letting agents (including management fees)
- Gardening and lawn mowing (including felling or pruning trees)
- Secretary and bookkeeping fees associated with the collection of rent and payment of property expenses
- Bank charges on the account used to receive rent and pay expenses
- Council rates and land tax
- Insurance (building, contents, or public liability)
- Credit checks
- Pest control
- Bank or solicitor fees for keeping title documents safe
- Taxation advice relating to the property
- Legal expenses to eject a tenant for non-payment of rent
- Hiring a debt collector to collect rent arrears
- Getting new keys cut
- Servicing items such as hot water heaters, smoke alarms, air-conditioning systems and garage door mechanisms
- Water supply charges (to the extent that they aren't paid by the tenant)
- Quantity surveyor
- Security patrols
- Security system monitoring and maintenance

DON'T GET CAUGHT OUT MAKING THESE MISTAKES

- ***Not having receipts*** **-** Once your total rental deductions exceed $300 per owner, you must have receipts for all items. If you don't have receipts (not bank statements or credit card statements, actual receipts), you can't claim the deduction.
- ***Claiming personal items*** **-** Putting through a Bunnings receipt that you spent on your own home, claiming interest on a portion of a loan that you used for personal purposes – the ATO is very strict on this. You can only claim items that relate to the rental property. This also relates to short-stay accommodation – if you use the property personally, or allow family and friends to use it at a discounted rate, you can't claim 100% of all expenses. You must apportion for private use.
- ***Claiming improvements as repairs and maintenance*** **-** There are many rules to navigate when performing work on your rental property to ensure you claim the deduction correctly. Getting your property ready to rent, making initial repairs shortly after purchasing a rental property, or once your tenants have vacated if you are putting the property up for sale are generally improvements and must be depreciated over several years (or added to the cost base for capital gains tax calculations). Repairs are where there has been genuine wear and tear or damage to an item as a result of renting out the property (fixing leaking taps, or fences that have been damaged in a storm). If you replace the item with a similar item, you can claim this amount outright. Maintenance is the prevention or fixing of the deterioration of an item (i.e. painting faded interior walls or re-oiling a deck). Again this can be claimed outright. However, if you go beyond repair or maintenance, it is more likely to become an improvement. Examples include – replacing an entire fence, not just the damaged section, or installing a new kitchen rather than replacing a damaged benchtop.

Avoid making these common mistakes

Carbon's Michelle Maynard identified some of the common mistakes landlords will make at tax time.

To avoid making these mistakes, Michelle Maynard says it's important to take the necessary steps.

"Keep all your receipts! You don't have to keep physical copies – scan them and save them online so they don't fade or get lost," she says.

"Get advice before you claim anything you aren't sure about – especially repairs and maintenance. Look at getting a depreciation report (if you don't have one already) or if you have performed substantial work on your rental property.

"Structure your loans correctly – if you refinance, keep the loan that relates to the original purchase price of the rental, separate from any other borrowings. Don't have a redraw account on a rental property account, because once you have paid ahead, if you redraw those funds the ATO deems that is for private use and you will then have to start apportioning interest."

dcma Advisory Mark Gellert

Associate Director of dmca Advisory Mark Gellert says to assist with interpreting the rules and including the many items associated with your property, the ATO releases an extensive Rental Properties Guide each year.

"This covers many of the income and expenses a person may encounter and how to deal with these appropriately," Mr Gellert told *Your Investment Property Magazine*.

"The guide also has recommendations on what records you should be keeping.

"However, this may not cover all your questions, so engaging an accountant who has experience in dealing with investment property (commercial and/or residential) will provide answers for items that aren't covered by the ATO guide.

"For example, where you have some private use or the property was not considered available for rent, you may need some assistance in calculating what should be claimed."

➤ Tips to ensure your tax return is completed correctly

To ensure a successful tax return that is completed correctly, Michelle Maynard says to first educate yourself on what you can and can't claim so you are doing the right thing.

"The ATO has some great free guides on their website. If you do your taxes yourself, make sure you lodge them by 31 October. If you use an accountant or tax agent, you get a longer lodgement time," she said.

"Know that the ATO is focused on this area so be prepared to have your returns checked. Keep all your receipts or documents for up to five years after you lodge.

"Use technology to your advantage – start an online folder so everything is saved in one place."

Echoing this sentiment, dmca Advisory's Mark Gellert says to always ensure you have the right records to substantiate the expenses you are claiming in your return.

"If the ATO reviews your claims and you can't substantiate this, they will disallow the expense," he said.

"Where there has been an unusually tough year for income and expenses, make sure everything is documented. The ATO in deciding what to audit has high-tech systems that check for returns that are unusual.

"Keep on top of your record keeping. If you leave it to the end of the year and try to track down your expenses, remembering what happened earlier in the year or what was spent on what property can be a lot harder than it needs to be." YIP

5 lessons from the last downturn that can help you build wealth safely

It's no secret that the property market moves in cycles. We're currently experiencing a market that has been trending lower, and as investors, we understand that there will be ups and downs.

OUR EXPERT

RASTI VAIBHAV
is the author of The Property Wealth Blueprint and CEO of buyers' agency Get RARE Properties

WHEN MARKETS ARE SLOW, it can be helpful to look at what's happened in the past to try and give us a glimpse into how the current cycle might play out.

Over the last two decades, there have been periods where prices have fallen. During the 2017-2019 housing downturn, national home prices dropped around 10.7%, according to CoreLogic, while during the GFC, we saw a 7.8% fall from peak to trough.

While these are not significant drops when looked at on a long-term basis, we still need to ensure our portfolios can thrive during all market conditions.

1. Diversification

During the 2017-2019 housing downturn, investors who diversified their property portfolios across different regions and asset classes were better protected against market downturns. Typically, places like Sydney and Melbourne, which have the highest property prices in the country, are the ones that lead the cycles up and then also lead them down. This is especially true when interest rates weigh on prices, as they are the markets where mortgage holders carry the most debt.

By diversifying your holdings and owning properties in different areas and even states, you can often better withstand declines. As we know, all markets move differently and don't just follow the national trend.

2. Importance of long-term thinking

While the declines during the GFC and the 2017-2019 downturn might have felt severe at the time, when you pull up a long-term chart of house prices in Australia, you can see that they are barely a blip on the radar. With our rising population and limited supply of quality land, values will continue to appreciate. If you keep that long-term perspective in mind, you can focus on identifying high-quality opportunities in all market cycles.

The Australian property market experienced a recovery after the 2017-2019 downturn and the GFC, reinforcing the importance of a long-term investment strategy and patience during market slumps.

3. Financial prudence

Irrespective of the market conditions, the onus is always on the investor to ensure their financial situation is under control. Investors who maintained a financial buffer and practised responsible borrowing during previous downturns were better equipped to weather market volatility and avoid financial stress. They are also the ones who are well-placed to capitalise when opportunities present themselves.

If prices fall, that is typically going to be an opportunity for savvy investors, but only those who are prepared will be able to jump at the opportunity.

4. Market research and due diligence

The great thing about property is that you can buy in any market and the more work you're prepared to put in, the better the result. Thorough research and understanding of local markets, property trends and demographics can help investors identify undervalued properties and opportunities during the downturn. Opportunities always exist to find properties that are priced competitively or offer the ability to manufacture equity. These strategies were incredibly effective during previous downturns and saw people continue to grow their portfolios.

5. Don't stop

Those people who have done best in property and built large portfolios all have one thing in common. They never stopped. It didn't matter what the market was doing or what problems were happening worldwide. They just focused on what they could control and purchased quality investments when they could afford to do so. While timing the market can help, time in the market is more important. Being consistent is far more important than waiting for the perfect time to get involved.

Market downturns are going to be something that will always happen. The property cycle will move from periods of low demand to high demand, but values over the long term will typically continue to rise. Instead of trying to time the market and buy at the perfect time, you're far better off trying to buy well when you have the financial capacity to do so. Property is a long-term game, so the sooner you start, the better. YIP

Understanding *property purchases* via an SMSF

Investing in property via a self-managed super fund (SMSF) can be a profitable way to add wealth to a retirement savings nest egg, as **Rebecca Jarrett-Dalton** explains.

OUR EXPERT

REBECCA JARRETT-DALTON
is a mortgage broker and owner of mortgage brokerage Two Red Shoes.

AUSTRALIA'S LOVE AFFAIR WITH PROPERTY has no end in sight. As the market heats up again, more Aussies are turning to their super as a means of gaining a foothold in the market. Though not without risks, investing in property via a self-managed super fund can be a profitable way to add wealth to a retirement savings nest egg.

Who is doing it?

According to the ATO, there are currently over 603,000 SMSFs holding $869 billion in assets, with more than 1.1 million SMSF members. Total SMSF investment in real property has risen to $166.9 billion in 2020–21, up from $163.0 billion in 2019–20 and $137.0 billion in 2016–17. Thanks to the rising value of Australian real property, SMSF-held property values are soaring.

A breakdown of the numbers reveals direct investment in non-residential real property grew by 15% from $64.7 billion in 2016–17 to $74.7 billion in 2020–21, while investment in residential has grown by 23% from $33.7 billion in 2016–17 to $41.6 billion in 2020–21. SMSF investment in residential real property both directly and through LRBAs makes up 0.8% of the total Australian residential property market and is worth $70.2 billion.

Faced with the lacklustre stock market performance of late, a sizable and growing number of Australians are instead choosing to purchase property through an SMSF. Other drivers include hitting borrowing capacity limits outside of super, not having the deposit needed to buy property in their personal names, the perception of better value and tax breaks from this type of strategy, and of course rock-solid confidence in property as an investment.

Compared to the complex investment products available on the market, property is tangible and easy to understand. It can mitigate risk to an SMSF investment portfolio by diversification. There's also the added benefit that an SMSF loan can be repaid with pre-tax dollars, which allows investors to whittle down the debt much more quickly.

Another advantage to purchasing property via your SMSF over purchasing in your personal name is that there are capital gains tax advantages at retirement. Most of all, the potential for capital growth means there is a healthy return to the fund while the investment is in place. An SMSF property investment is separate from your personal investments so there's no need to worry about borrowing capacity limits as much.

How SMSF property investment works

Property investment via an SMSF is subject to strict rules based on the 'sole purpose' test, that is, a purchase must only provide retirement benefits to fund members. Australians are permitted to use their super to buy an investment property, but not one they plan to live in. Neither can they purchase from or rent to 'related parties' which include relatives, business partners, any spouse or child of those business partners, employers, any company or trust that the member or their associates control and so on.

One exception to this is that an SMSF-owned commercial property can be rented out to fund members in their capacity as a business owner e.g. the fund member is a doctor and is paying commercial rates to rent the SMSF-owned GP practice.

An SMSF can have between one and four members who must make collective decisions about how to invest their super. Property purchases can either be residential or commercial - they commonly include commercial units like offices or small warehouses, standard residential properties and occasionally land. Borrowing money to buy property is usually done through a Limited Recourse Borrowing Arrangement (LRBA). In this setup, the SMSF trustees receive the beneficial interest in the purchased asset, while legal ownership is held in trust.

There are strict stipulations on how super funds can be spent on investment properties. Investors must know that alterations to the property are not permitted under the rules that govern SMSF property investment. Although you are allowed to undertake normal repairs and maintenance to the property, improvements and renovations are not permitted.

Neither can SMSF members use the entire balance of their funds to buy an investment property. SMSFs are required to keep a "liquidity buffer" worth 10% of the proposed investment's value in cash and shares. There are many hidden costs involved in buying a home via an SMSF too. Banks will only lend up to 70% of the house value, and don't allow lenders mortgage insurance to increase that amount which means that a deposit and all associated fees must be paid upfront.

SMSF property investment risks

The onerous compliance obligations are a major drawback to making SMSF property investment work. On top of the substantial cost associated with regular property purchases that include stamp duty, agent and legal fees, there is also the higher cost of compliance. SMSF property investment is subject to auditing - all assets need to be valued at market value, and the valuation needs to be based on objective and verifiable data.

Because of the costs involved there's a particular minimum fund value generally considered as the minimum before investing in property becomes advisable – this is currently around $250,000 but rises with the value of properties.

Purchasing and selling an SMSF property is complicated, which means your investment strategy isn't as "liquid" or moveable as a share portfolio. Property is subject to rise and fall in value as well as potential issues related to finding and keeping a good tenant. Lastly, future potential changes in legislation regarding property investment with an SMSF can create an environment of uncertainty for investors.

Is SMSF property investing for you?

Determining whether investing in property through an SMSF is a worthwhile strategy for retirement calls for good quality advice from a financial planner, accountant and potentially an SMSF expert to assist with establishing the fund. Because of the high level of knowledge and compliance measures required to make an SMSF property investment work, this strategy isn't for everyone.

Though it can be expensive and time-consuming, those with the right tools and knowledge can absolutely use SMSF property investment to accumulate funds for retirement, but they must always make sure to be on the ball if regulation requirements or their circumstances change. YIP

How investing in *real estate abroad* can make you money

Curious about investing a bit further afield? With over 20 years' experience helping clients buy and sell properties in Spain, Founder and Director of real estate agency Cloud Nine Spain **Sean Woolley** explains how to choose an investment property abroad.

OUR EXPERT

SEAN WOOLLEY
is the founder and director of leading real estate agency Cloud Nine Spain.

BUYING PROPERTY IN A HOLIDAY DESTINATION such as the South of Spain is always a good choice as an investment. These destinations allow you to generate rental income by renting short-term during the holiday season, while still having a base to explore Europe and enjoy the culture, food and lifestyle in the off-season. They are also ex-pat havens and so have a thriving long-term rental market if you don't want to use it yourself right away.

Obviously, like any investment, property values can go up and down, but normally the good thing about property is that it never goes down to zero. So, if you invest a hundred thousand Euros, you might see a significant fluctuation, for example between €50,000 and €150,000, but you'll never see it come down to zero, which is what can happen in a lot of equity markets.

In the Spanish market, we've lost a lot of those speculative investors that we had, and we don't see people entering the market now to make a quick buck. Of course, people are always looking to make money, but I think people now are looking at it as a medium to long-term investment. They're not looking to flip properties, as the conditions aren't there in the market, banks aren't lending at 100% and costs are high to buy and sell property in Spain.

A note of caution is to beware of get-rich-quick schemes, which claim things such as "guaranteed rental returns of 15%". Evaluate them logically and they don't usually stack up. You're either subsidising that return by paying an inflated price in the first place or it's not going to deliver what they are claiming.

I have spent over 20 years working in real estate in the holiday destination of Marbella on the Costa del Sol in Southern Spain and have helped hundreds of people buy investment properties. In this article, I want to guide you through a few things to think about when choosing a property for rental and offer you some tips for maximising rental income.

How to choose an investment property

If your main purpose in buying this property is to generate rental income you need to be thinking with your head, not your heart.

Normally the two gauges used to assess the suitability of an investment property will be a) the potential for capital growth and b) the potential for rental income. For investors, it should all be about the financials, the numbers. It may not even be a property that they "like" or "love". If the figures stack up and there is likely to be a quick and easy exit strategy in the event of needing to sell, then personal taste needn't play a part in the decision-making process.

Make sure your agent knows you're planning to generate rental income from your property and that you discuss the most popular property types and the most popular locations for rental, to ensure you make the right decision.

Location is key! The closer to the beach and amenities it is the better, as it will tick more boxes for more people. Easy access to the airport, and to public transport, will also give you an advantage over more isolated properties. Once you've chosen the right location you need the right space and facilities on the development to give you more selling points to set you apart.

Problems can arise if buyers are looking to purchase a holiday home that they intend to use for part of the year themselves, but with which they also want to earn a decent rental income. In this highly common scenario, there is often a conflict between head and heart as the criteria for investment and personal enjoyment both need to be met.

As in all property purchases, a degree of compromise needs to be factored in. After all, buying a property that will appeal to the mass rental market may not necessarily accord with your own personal wish list. For instance, buyers may like the idea of owning a holiday home in the hills, surrounded by nature, but is this the sort of place that would appeal to holidaymakers looking for a family holiday in the sun? A balance that satisfies both financial and emotional needs is often hard to find, but an experienced agent with plenty of local knowledge should be able to guide and assist in cases like this.

How to maximise your property's rental potential

Once you've got a good property in a great location you need to make sure your marketing is spot on and get the price right.

The short-term market in holiday destinations like Marbella is highly competitive. This means you've got to have your property stand out in terms of presentation, and location and it's got to be priced correctly. Check similar properties online and where they are pricing themselves. If you can be slightly lower than the majority of your competition and still make an attractive return, then you are likely to be fully booked. This is a good idea when you get started so you can improve your ranking in listings, get reviews and create a strong platform to build on. If you're not willing to reduce your price, then it will take longer to gain momentum and have consistent bookings throughout the holiday season (April to September).

Another way to stand out is to tick as many boxes as possible for your guests, present your property beautifully and make sure you definitely offer international TV and high-speed internet. Remember that people may still need to work while they are on holiday and kids like to stream their favourite shows, or video chat with friends, so WiFi throughout is essential.

Once you have a good price and a property that is well-presented and has all the key points that rental clients are looking for, it's all about marketing. Make sure you have professional images taken, with the property looking its very best, as this will make it stand out online.

Deal with a rental agency that promotes the property in as many geographical areas as possible and that they are listing them on rental portals such as bookings.com, Airbnb, etc. Ask them if

they are also marketing it to their database of clients and being proactive to find tenants. Also, make sure you tell people about your property and promote it to your network of family and friends in person and on social media – you never know where bookings will come from!

Consider long-term rentals

As I mentioned, short-term rentals are highly competitive and very seasonal, so if you're not using your property yourself in the low season, it can be sitting empty for long periods of time. There are also regulations you have to comply with when renting short term and you must have a certificate to allow them to be rented. Like hotels, holiday rental owners need to ensure their guests fill in a form, take copies of their passports and register them at their local police station. Although most property management professionals will do this for you, this has put off some people from continuing with their short-term rentals.

However, the long-term rental market is very strong, with a shortage of properties and high demand pushing prices up. COVID and remote working have encouraged more people to take the plunge and relocate to sunny places like the Costa del Sol. Many of these people want to try before they buy, so long-term rentals are really popular right now.

Although you'll have to wait to use it yourself for a while, and the returns aren't as high per week, it's an excellent source of steady income, with little work required. If you have a good agent, your marketing is strong and the price is right, you should have little trouble finding a long-term tenant.

As a rule of thumb, a property for long-term rental will attract approximately the same revenue per month as a property for short-term rental would attract per week. So, if your apartment fetches €1,000 per week in August as a holiday let, it is likely to also achieve a monthly rental figure of €1,000 if let on a long-term basis.

Long-term rental provides consistency and reliability of income levels throughout the whole year. There are no changeover/cleaning costs to pay to a management company after each guest leaves, and the tenant usually pays the utility bills. In these uncertain times, this could be just what you need to continue to make money from your property without the stress.

Conclusion

There's been a continued high demand for holiday rentals and a shortage of good-quality, well-furnished homes available for long-term rental, both of which offer genuine opportunities for real estate investors on the Costa del Sol and in other holiday destinations around the globe. Experts predict that the property market in Spain will continue to be strong in 2023 and therefore investors can continue to invest with confidence.

The key, as always, is to purchase in the right locations – ideally close to amenities – and to ensure that community fees don't eat into your profit margins too much (in Spain, the landlord pays these fees!). An experienced real estate professional will be able to guide investors towards the best opportunities and provide income and cost estimates to assist with the budgeting forecasts. VIP

NSW

The New South Wales property market turned a report card showing a better-than-expected performance over the first half of 2023.

PROPERTY CURATOR PRINCIPAL BUYER'S AGENT BRENDAN CLARK said some areas in the state, particularly the inner-ring and premium suburbs have seen substantial increases in competition for properties, with higher auction clearance rates and less vendor discounting.

"The $1m to $1.5m entry-level home market in Sydney has performed well in recent months," he told *Your Investment Property Magazine*.

"This is partly driven by the new NSW First Home Buyer choice policy, which allows first home buyers to choose between an annual property tax or an upfront stamp duty."

It is crucial to note that the First Home Buyer choice, which took effect at the beginning of the year, will be scrapped by July. The new leadership in the state government will be reintroducing a stamp duty exemption instead.

"It's natural to conclude that some heat will come out of that market — however, with investors returning to the market and with a lack of stock in many areas, I don't expect this will necessarily lead to a noticeable drop in prices across the board."

Overall, Mr Clark said the Sydney market as a whole would likely post modest growth for the rest of 2023.

HALO Technologies' economic advisor Warren Hogan said Sydney was able to support the overall price growth over the first few months of the year.

"The Sydney market recovery is largely being driven by top-end property and apartments," he told *Your Investment Property Magazine*.

The recovery in the apartment segment is expected to be sustained, given that prices are close to long-term fair-value levels and the immigration surge will have an outsized impact.

"We are not seeing an increase in the supply of apartments to accommodate the rise in population so this will be a position for apartments in Sydney," Mr Hogan added.

For Mr Clark, investors who will be trying to explore the opportunities in Sydney must focus on fundamentals by checking areas they believe are best positioned for capital growth

"For house buyers, I look at accessibility to lifestyle and jobs infrastructure located in suburbs with strong local communities," Mr Clark said.

"For unit buyers, that's focusing on properties that have amenities which support long-term owner-occupier appeal."

"To mitigate the risk of oversupply in the future, I'm purchasing units in boutique, older style blocks, and avoiding areas with higher density zoning."

When looking at regional markets, Mr Clark said the best places to check are the Central Coast, Newcastle, and Wollongong.

"The suburbs I'm targeting stand to benefit from the revival of the Sydney market and provide a cheaper entry point into the market for investors."

VIC

A two-speed market is likely to unfold in Victoria for the remainder of 2023.

PROPERTY CURATOR PRINCIPAL BUYER'S AGENT BRENDAN CLARK said while Melbourne is starting to see green shoots, things are starting to slow down in regional markets of Victoria.

"Melbourne property prices seem to be stabilising and confidence is returning to the market," he told *Your Investment Property Magazine*.

"Prices have increased from recent lows in many suburbs, with a noticeable cluster in the middle ring suburbs to the east of the city."

Meanwhile, regional markets are likely seeing a slowdown in activity, as total property listings increase and rental vacancy rates rise.

"Affordability constraints and the continuing 'return to the city' movement are expected to push prices down in some regional markets," Mr Clark said.

Melbourne is benefiting from the increased migration intake. The city continues to be home to more migrants than any other city in the country.

This will ultimately translate to robust performance in some inner-city and inner-ring unit rental markets, particularly those popular with international students.

Mr Clark said Greater Melbourne has pockets of affordability for property investment with a range of price points to choose from.

"I expect affordability drivers to see some lower-priced areas doing relatively well over the medium term. However, caution is needed to find areas that are not subject to large amounts of new supply," he said.

"Focusing on established areas with access to transport and jobs, usually in the middle ring, generally presents safer options for long-term buy-and-hold investors."

While yields in Melbourne are relatively lower than in other capital cities, there are positive trends that would bode well over the longer term.

"In general, there aren't as many opportunities for apartment investors, with supply risk still being a real consideration, along with a general market preference for freestanding homes," Mr Clark said.

"There are some opportunities with well-located villas and townhouses in tightly held areas, but investment grade options are still relatively scarce."

In current market conditions, investing in Melbourne could be more lucrative than in Victoria's regional areas, given the "return to the city" trend.

For instance, while the towns of Ballarat and Bendigo have been popular with investors in recent years, the sharp inventory over the past months could suggest downward pressure in prices ahead.

"Further afield, towns that are too reliant on a single industry, including tourism-dominated areas, are riskier ones to avoid," Mr Clark said.

"While there is generally a rental undersupply in most of these areas, the ability for capital growth and continued rental growth is seen as relatively limited."

QLD

Queensland's property market is slated to witness capital growth in the second half of the year as Australia traverses the tail end of the interest-rate hiking phase.

VENTURE CROWD HEAD OF PROPERTY DAVID WHITTING said in a general sense, property prices in Queensland have already fallen by some 12% after the massive rises amid the height of the pandemic.

"Housing values have been underpinned as banks have not forced sales, and listings have fallen over 20% from last year as owners have used pandemic savings to pay off increased mortgage rates," he told *Your Investment Property Magazine*.

For the rest of 2023, the property market will be tested by the competing forces of higher interest rates offset by high employment, big savings buffers, lack of supply and the strength of the leasing market.

"Many predict levelling for the remainder of 2023 and even interest rate reductions towards the end or into 2024 as inflation comes down and unemployment rises," he said.

"If you can afford it, enter the market — evidence including a general slowdown or cessation of interest rate raises, coupled with minor house price rises in most capital city markets in the last month, the dire state of the rental markets, Australia's increased immigration rates, plus an extreme lack of new supply, all point to capital growth in the second half of the year and onwards for both principal place owners and investors."

Over the next few months, the apartment markets in inner-city and near inner-city ring suburbs or in lifestyle areas like Gold Coast will remain lucrative for investors.

For those with constrained budgets, outer Brisbane markets look comparatively well-priced. Some examples are Ipswich, Redbank Plains, Riverview, Logan, and Carrara.

Mr Whitting said it is also viable to consider apartment markets in lifestyle locations where the richest cohort in the demographic range are retiring into.

"The one rider to this is a supply-side issue — there are not enough Tier 1/2 & 3 builders going around if it's a really big tower. Aim for a smaller to midrise product if off-the-plan," he said.

Lastly, investors can also consider looking into the suburbs that will likely benefit from the infrastructure projects related to the 2032 Brisbane Olympics.

"Look for these suburbs as well as those around new precincts to be delivered and beautified," Mr Whitting said.

WA

All signs seem to be pointing to Western Australia's robust market performance in the foreseeable term.

THE INVESTORS AGENCY CO-DIRECTOR DARREN VENTER said while other states witnessed dramatic rises in property values in recent years, Western Australia became the accessible and sensible option for many buyers.

"On the backend of 2022 and the beginning months of 2023, first-home buyers dominated the market and grew market values, which in turn sparked the interest of investors and opened the doors to increased rental rates as more investment properties became available," he told *Your Investment Property Magazine*.

For the rest of 2023, Perth's property market is set to deliver a strong performance, riding on Western Australia's economic projects focused on gentrifying areas that stimulate council projects and the race towards reducing carbon emissions by 2030.

"Immigration, employment and economic uplift are supporting the region's property market as affordability is generally highest in comparison to all other states and territories," Mr Venter said.

Some markets to consider include councils south of the Perth metro that is benefitting from downsizers and first-home buyers, like Mandurah and Meadow Springs.

Meanwhile, employment and population growth will enrich areas around Kwinana like Medina and Orelia.

Closer to the CBD, accessibility is strong around areas like Balga.

Investors entering the market, Mr Venter believes, need clever planning that will allow them to buy with smaller deposits, providing an opportunity to stretch their savings between multiple purchases.

"Accounting for lender's mortgage insurance and the higher interest rate that smaller deposits warrant, investors can still

navigate purchases without feeling a financial burn, this is mainly because the rental increase is expected to climb well with values resulting in the savvy investor being able to recover the temporary shortfall with very little trauma and benefiting for the real price, being market value," he said.

However, Mr Venter said investors need to ensure they are closely watching market fundamentals and not just crowds.

While popularity signifies good growth, often suburbs that are highly publicised have already reached their peak, leaving little room until they undergo a correction.

"The medium to long-term forecasts in Western Australia's performing suburbs that are gentrifying hold good promise for long-term gains," Mr Venter said.

"The development of new assets in areas where vacancy rates are low is being very closely monitored and responsibly portioned land release is keeping the market from becoming oversaturated."

"The new developments that will be introduced into these areas will hold higher values and in the long-term benefit median valuations."

SA

The first half of the year has been challenging for the South Australian housing market as it endured the impacts of consecutive increases in the cash rate.

FROM A LONG-TERM PERSPECTIVE, however, the state has yet to lose its charm as an investment hotspot.

The Investors Agency co-director Darren Venter said rental yields have been reduced in many South Australian suburbs, mainly the Adelaide metro ones, due to the recent market correction.

"Naturally, when this happens, sentiment within the market slows down because the ability to repay mortgages becomes more difficult — this has allowed the rental market to catch up as demand increases for renters," he told *Your Investment Property Magazine*.

"With yields currently being accessible, while we are expecting rental rates to increase, property market prices will too, and natural values increase faster than rent, which results in falling yields, making it more difficult to hold in the short term."

"However, investors make their riches from the growth of the assets that buy, and on the flip side, we're expecting the majority of the Adelaide outer Metro markets and main regional markets to perform very strongly over the long term."

For the rest of 2023, any movement in the state's population could provide a boost to the overall property market.

Mr Venter said the state's population movement is well supported by more attainable working visas — while work experience is a strict requirement, the state holds a very broad range of options to apply for.

"With Australia's net migration ramping up again, South Australia will benefit from a broad range of highly skilled labour," he said.

For investors, it is crucial to note that not all markets will bear the same benefit.

"Immigration and accessibility will benefit the regional markets such as Whyalla Stuart, Port Augusta and Stirling North, while areas such as Hackham and Christie Downs are still accessible and supported by good amenities and pricing, which allows for first-home buyers to enter and impact the markets," Mr Venter said.

Mr Venter said with vulnerability in interest rates being more prevalent, the ability to hold assets needs more support than ever.

"Targeting dual-income properties and those with easy uplift potential will create a safety net for investors," he said.

"With some of Australia's easiest subdivision regulations, investors should be thinking ahead when buying to gauge their future options and values."

TAS

Tasmania could be the perfect market for investors who are trying to diversify their portfolios.

NEXT ADDRESS FOUNDER AND CEO JULIE O'DONOHUE said Tasmania's real estate market has been performing remarkably well, with median house prices continuing to rise steadily in recent years.

"Despite the challenges posed by the COVID-19 pandemic, the market has remained resilient, with strong demand for properties across the territory," she told *Your Investment Property Magazine*.

Overall, the outlook for Tasmania's property market for the remainder of 2023 is optimistic — investors can secure properties with high capital growth potential and rental yields in the state.

"Investing in Tasmania's property market has the potential for substantial capital growth and rental yields, and with careful research and a sound investment strategy, investors can identify properties with high potential and build a successful portfolio," Ms O'Donohue said.

The bustling city centre of Hobart, with its range of cultural attractions and business opportunities, is the best hotspot for property investment.

But for investors who want less competition, the vibrant regional centre of Launceston can be a great alternative. Its diverse economy, growing population, and affordable housing options make it a lucrative location for investors.

The coastal town of Devonport is also a market that investors should set their eyes on — it possesses robust potential for growth thanks to its strong tourism industry.

Also worth considering is the emerging regional centre of Burnie, which has a focus on renewable energy and advanced manufacturing industries.

Investors may also want to invest in Kingston — its proximity to Hobart makes it in demand for potential tenants.

Ms O'Donohue said investors in Tasmania should undertake thorough research into the local real estate market, including examining property prices, rental yields, and vacancy rates.

"In the long term, Tasmania could face issues including changing demographic trends and the availability of land for development — both of which will impact housing affordability," she said.

"Still, the next few months could be an excellent time to invest in Tasmania's property market."

SUBURB SPOTLIGHT

Bicheno

Heat's come out of the market

BICHENO IS A PICTURESQUE SEASIDE TOWN located on the east coast of Tasmania. Known for its stunning beaches, rugged coastline, and abundant wildlife, Bicheno is a popular destination for tourists and locals alike. Despite its small size, Bicheno is well-connected to the rest of Tasmania, with several major highways located nearby. Public transport options include bus routes and a nearby airport, providing easy access to other parts of the state and beyond. The town also features several dining and shopping options, including locally-owned cafes and restaurants that showcase the best of Tasmanian produce.

History

Bicheno is also home to several historic sites, including the Governor's Cottage, which was built in the 1840s and is now a museum.

Location

The town is located just a short distance from several other popular destinations on the east coast of Tasmania, including Freycinet National Park and the Bay of Fires.

NT

While the Northern Territory seems to be steadily recovering since 2018, investors looking to invest in its housing market over the second half of 2023 must do so with caution.

NEXT ADDRESS FOUNDER AND CEO JULIE O'DONOHUE said the outlook for the territory for the rest of the year is "cautiously optimistic".

"The Northern Territory economy has seen a 4.7% growth over the last year with growth also recorded in employment and across the wage index," she told *Your Investment Property Magazine*.

"The territory government is working toward a $40bn economy by 2030 — which is a positive indicator likely to reflect on the property market."

For Ms O'Donohue, the improving economy would likely drive an increase in the demand for housing, which could, in turn, lead to a further rise in property prices.

"However, unforeseen economic or political changes could have an impact on the market."

Still, Ms O'Donahue said while many investors may find the rest of 2023 an opportune time to invest, it is still crucial to carefully assess individual financial circumstances and seek professional advice before making any investment decisions.

"Investing in the Northern Territory certainly has a good scope as long as you undertake thorough research and consider growth factors and pick the right location, considering the proximity to employment, education, transport and shopping," she said.

"Investing around mining operation can bear good returns but may face limited timeframes for demand and growth."

While Darwin CBD is on top of the list of locations to consider when looking to invest in the Northern Territory, there are other

promising markets worth considering.

Palmerston, for instance, is a viable option — it is a rapidly growing residential area in northern Darwin that houses affordable property choices.

The regional hub of Katherine is another market to look into, with its strong mining and agriculture industries.

For investors who want consistent gains, Alice Springs is the best bet. It is the second-largest city in the territory and is known for its diverse community and tourist attractions.

The remote town of Nhulunbuy in East Arnhem Land is also promising, thanks to its mining and tourism industries.

SUBURB SPOTLIGHT

Nightcliff

Prices coming off the boil but homes still selling fast

NIGHTCLIFF IS A VIBRANT COASTAL SUBURB located in the northern suburbs of Darwin. In addition to its natural beauty, Nightcliff is also home to a range of dining and shopping options, including the Nightcliff Markets. Despite its laid-back atmosphere, Nightcliff is well-connected to the rest of Darwin, with several major roads and highways located nearby. Public transport options include bus routes and a nearby train station, providing easy access to other parts of the city. Nightcliff is also home to several excellent schools, making it a popular choice for families with children.

Education
The suburb is home to several excellent schools, including the Nightcliff Primary School and the Nightcliff Middle School.

Amenities
Nightcliff is home to several popular attractions, including the Nightcliff Markets, which are held every Sunday and offer a range of fresh produce, arts and crafts, and live music.

ACT

The property markets of the Australian Capital Territory are in for a positive ride for the remaining months of 2023.

NEXT ADDRESS FOUNDER AND CEO JULIE O'DONOHUE said the demand for property, particularly in Canberra, is likely to remain high on the back of several economic indicators, such as low unemployment, strong population growth, and increasing interest from investors.

"It is difficult to predict the future of the property market, but the current low-interest-rate environment and high demand for housing in Canberra suggest that now could be a good time to enter the market," she told *Your Investment Property Magazine*.

"However, it is important to carefully consider individual financial circumstances and to seek advice from a professional before making any investment decisions."

In the short term, the ACT market could still be impacted by changes in government policies, fluctuations in interest rates, and supply chain disruptions.

Meanwhile, rising house prices and affordability may become issues for home buyers and renters alike in the long term, as well as the possibility of a downturn in the economy.

Ms O'Donohue said investors looking to enter Canberra's property market should always keep in mind the importance of good rental returns and strong capital growth potential.

"Canberra has a unique aspect to its market, being the nation's capital there will always be a high degree of incoming populous across public service, students and migration adding to population growth and hence demand for property, be it rental or buying both of which drive price growth over time," she said.

Outside Canberra City, there are other markets in the ACT worth considering.

Belconnen, for instance, is a growing residential area north of Canberra where buyers can find affordable property options.

Woden Valley is also an option — it is already a well-established residential area close to the city with various properties to suit different budgets and lifestyles.

For investors seeking affordable properties in a market with a range of new development, Tuggeranong is the place to be in.

Sporting modern amenities and new housing projects, Gungahlin also presents itself as a great option for investors.

Vacancies 12 mths ago

Is the number of rental properties that were unoccupied and being advertised for rent 12 months ago.

Vacancy rate 12 mths ago (%)

Is 'vacancies 12 mths ago' divided by total rental dwellings 12 months ago, expressed as a percentage. By comparing this number with the current vacancy rate, you can see if the rental market has improved or worsened from the landlord's point of view.

Current vacancies

Is the number of rental properties currently unoccupied and being advertised for rent. Be aware that this number may be high simply due to there being a high total number of rental dwellings in that suburb.

Current vacancy rate (%)

Is current vacancies divided by total rental dwellings, expressed as a percentage. A vacancy rate of 3% is considered balanced and anything less than 2% would suggest that renting out a property in that area is easier. A vacancy rate of more than 4% is considered high and would suggest that renting out a property in that area is more difficult.

STOCK ON MARKET

This section provides an important insight into the availability of both houses and units in more than 3,000 suburbs across Australia – in other words, how easily you could buy a property in that suburb if you're looking to invest, and how easily you could sell a property you already own in that suburb if you're looking to cash out. SOM is compiled by realestateinvestar.com.au and *Your Investment Property Magazine*.

Data is the most up to date available at time of publishing – April 2023. Suburbs are listed numerically by postcode, lowest to highest.

Current houses
Is the number of houses currently being advertised for sale. A high number could mean you'll have plenty of choice if you're looking to invest, or conversely plenty to compete against if you're looking to sell. Some suburbs have hundreds of houses for sale, others none at all.

Current units
Is the number of units currently being advertised for sale.

Houses 12 mths ago
Is the number of houses that were being advertised for sale 12 months ago. By comparing this number with the number shown under 'Current houses', you can see how the level of housing stock has changed over the year. A high increase in housing stock could indicate more supply coming into the market, and a drop could mean the market is tightening.

Units 12 mths ago
Is the number of units that were being advertised for sale 12 months ago.

Change (%)
Is the change in the total number of houses and units that are currently being advertised for sale compared to the total number 12 months ago, expressed as a percentage. A positive figure would typically mean the market has more stock coming online due to seasonal factors such as the spring selling season or new housing developments in the area.

PRICE GUIDE

This section provides comprehensive statistical information on price movements for houses and units in more than 5,600 suburbs. Designed to keep you fully informed on market activity across Australia, the Property Price Guide is compiled by CoreLogic RP Data, Australia's biggest property data provider, and *Your Investment Property Magazine*.

Data is the most up to date available at time of publishing – February 2023. Suburbs are listed by state/territory, then alphabetically.

Australian Capital Territory	313

Median price ($'000)
is calculated by compiling all the property sale prices in a suburb during the past 12 months and then taking the middle figure. It is a good measure to detect changes in the market by way of price movement.

3-mth growth (%)
is the percentage change in the median price over the last three months, and is a good short-term indicator of whether property prices in that suburb are currently rising or falling, although this can be volatile in nature.

12-mth growth (%)
is the percentage change in the median price over the last 12 months, and shows how the market has moved over the medium term. Anything over 10 would represent very strong growth.

Average annual growth
is the average percentage change in the median price over the last 10 years, expressed as a per-annum figure. This statistic irons out the shorter-term peaks and troughs in the market to give a good measure of long-term market performance. Anything over 7.5 would indicate exceptionally strong growth (more than a doubling in price over the full 10 years).

3-yr growth (%)
is the total percentage change in median price over the past three years. Anything over 25 would indicate exceptionally strong growth.

5-yr growth (%)
is the total percentage change in median price over the past five years. Anything over 40 would indicate exceptionally strong growth.

Weekly median advertised rent ($)
is the median weekly asking rent for listed rental properties over the last 12 months, expressed as a simple dollar figure. It is the best way to compare rental income in different suburbs.

Gross rental yield (%)
is the estimated gross rental return, calculated by multiplying the weekly rent by 52 weeks then dividing it by the median price. Beware that the rental yield goes up when the median price falls, so an increasing rental yield is not always good. You will ideally have rising yield on the back of rising prices. A gross yield of around 6 allows for both strong cash flow and growth.

Vendor discount (%)
is the average difference between the initial asking price and the final selling price.

Average hold period
is the average number of years owners hold their properties before selling. A number over 10 indicates a tightly held suburb in which stock on the market is often low; a number below five indicates a suburb with rapid turnover. A high number also suggests an area is dominated by homeowners and a lower number by investors. Typically, growth in tightly held suburbs is consistently strong over the long term and suburbs with shorter hold periods are generally more volatile.

Number sold
is the total number of houses/units sold in the suburb over the last 12 months. The number will be heavily influenced by the total number of dwellings in the suburb, so bigger suburbs tend to have higher sales and smaller suburbs could only have a handful. It also depends on the stock available in the market. So if there are only a few properties up for grabs in a suburb, naturally there will be fewer sales as well. This means you should not take this data in isolation but use it in conjunction with the other statistics to get a better picture of how active that suburb's market is.

Days on market
is the average number of days a property stays on the market in that suburb before it is sold. A lower number indicates that properties are highly sought after and quickly snapped up by buyers. A high number could mean low interest from buyers either due to unsuitable pricing or undesirable property offerings. Buyers are often turned off by properties that have been sitting in the market for longer than the average, which is three months. Typically, vendors become desperate when the property spends a long time on the market, which means buyers are in an ideal position to negotiate a hefty discount.
